

# Home Tour Planned November 4 in Jones County

A REMODELED KITCHEN will be featured at the home of Mr. and Mrs. Tobe Heath, Trenton, Rt. 1, during the Home Tour November 4th. Here Mrs. Heath (right) shows Mrs. Ann Brock, assistant home economics agent, how the hood over her stove works miracles.

Everything is in readiness for the Jones County Home Tour to be held in the county Wednesday, Nov. 4. The tour of five rural homes is sponsored by the Jones County Home Demonstration Clubs.

According to Mrs. Faytie Gray, home economics agent, much planning has been done with families this year to meet the family needs in housing. Throughout the year, Mrs. Gray has emphasized that in order for the family to gain the greatest satisfaction from their homes it should be planned for interest and activities of all family members.

At the first home, visitors will view the new addition to the home of Mr. and Mrs. Jack Mallard, Pollocksville. Featured in the Mallard home is the new Scheirick kitchen. The cabinets are birch and features convenient storage and working areas for a modern housewife. The kitchen is U-shaped with a built-in oven. The birch paneling continues in the dining area.

The home of Mr. and Mrs. Bill Duval, Pollocksville, is made of cinder blocks. This home features various types of blocks throughout the home. The livingroom fireplace features split rock made from concrete. DuVal did a lot of the work on his house himself.

After touring two homes, the group will meet at the Agricultural

Building for a picnic lunch.

Following lunch, the home of Mr. and Mrs. Tobe Heath, Trenton, Rt. 1, will be opened to guests. The kitchen has been completely remodeled and now has new windows, is U-shaped, and has a hooded stove. Mrs. Heath has more storage space than ever before. A utility room has been added for the freezer and it has a sink, storage space for conserved food, and a gun closet. Two bathrooms were added also.

Mr. and Mrs. Horace Phillips, Trenton, Rt. 1, have a new home with kitchen and family room together. The business center is featured. A planned area in which to keep all of the books and plans that contribute toward an efficiently managed farm is a necessary part of the center. Built-in features help in the organization of space and provide an opportunity for gracious and unhampered living. This home is an example of good home planning.

The home of Mr. and Mrs. Delmas Brown, Dover, Rt. 2, will show how a tenant house was converted into a convenient, livable home. Brown did most of the planning himself. The kitchen features a corner sink, bar, and sufficient storage space.

The tour will begin at 9:30 a. m. and all interested persons are urged to attend.
