

Lt. Arthur Kennedy On Duty in Korea

Lt. Arthur L. Kennedy, son of Mr. and Mrs. Owen A. Kennedy, Route 5, Box 331, Kinston, was assigned to the 76th Engineer Battalion in Korea, May 2.

Lieutenant Kennedy, a platoon leader with the battalion's Company B, entered the Army in January of this year and was last stationed at Fort Belvoir, Va.

The 23-year-old lieutenant is a 1961 graduate of Southwood High School and received a B.

S. degree in civil engineering in 1965 from North Carolina State University.

Kinston Girl's Mate Promoted to Major

Henry A. Dwight, son of Mr. and Mrs. Albert L. Dwight of Genesee, Pa., has been promoted to major in the Air Force.

Major Dwight is a B-52 Strato Fortress aircraft commander at Grand Forks AFB, N. D. He is a member of the Strategic Air

Command. The major received his commission in 1953 through the aviation cadet program.

Major Dwight is a graduate of Kane (Pa.) Joint Area High School. He received his bachelor of general education degree from the University of Omaha.

His wife, Peggy, is the daughter of Mr. and Mrs. Kirby D. Hawkins of 1000 Oriental Ave., Kinston.

Small Grain Test Plots on Sutton Sand Hill Farm

One of the official small grain variety tests conducted by State University is located on the farm of Joel Sutton, Route 6, Kinston (Sand Hill Township).

Several varieties and promising new breeding lines of wheat, oats, and barley are included in this test.

A group of University representatives and commercial people will visit this test on Thursday afternoon, May 26, at 2:30. Interested farmers in the local area are cordially invited to join them at this field meeting.

In addition to observing the test, the various individuals from State University and the seed companies will be glad to answer any questions farmers may have about small grain.

One of the new lines of wheat appears to offer promise and local farmers may be interested in it at this time.

What the World Wore

FASHIONS FOR 'THE FOURTH'

AN INDEPENDENCE DAY OUTING IN THE 1890'S WAS USUALLY SPENT IN THE COUNTRY OR AT THE SEASHORE. THE MOST CIVILIZED ATTIRE WAS A DRESS WITH STRIPES, WHILE STRIPES HAD BEEN IN VOGUE FOR MANY YEARS, THEY PERHAPS REACHED THEIR BOLDEST AT THIS TIME.

IN 1900 THE OUTFIT A LITTLE GIRL RAN AND PLAYED IN WAS A FAR CRY FROM THE SUNSUITS OF TODAY. TYPICAL WAS A MUSLIN DRESS WITH EMBROIDERY TRIM AND A CAP TO MATCH.

IN THE SWIM FOR JULY 4TH AROUND 1910 WAS THE ONE-PIECE KNIT BATHING SUIT. ACCORDING TO PRESS REPORTS OF THOSE DAYS THIS SUIT WAS A GREATER SHOCKER THAN THE BIKINIS OF RECENT YEARS!

TODAY... WHEN BUYING WOMEN'S OR CHILDREN'S APPAREL LOOK FOR THE LABEL-THE SYMBOL OF DECENCY, FAIR LABOR STANDARDS AND THE AMERICAN WAY OF LIFE.

If you're growing soybeans in the Southeast and you're not using new Dyanap, you may be growing more weeds than soybeans.

New Dyanap is the liquid weed killer combination that stays in the top layer of soil... right where weed and grass seeds germinate! Right where you need it. And new Dyanap stops more, different kinds of weeds because you can apply it whichever time is best for your own particular weed problem. (1) At planting, to knock out germinating weed seeds or (2) before beans come up, to get fast-sprouting weeds and grasses on contact. **New Dyanap stops the worst of your weeds.** Cocklebur, pigweed, Johnson grass (from seed), foxtail, crabgrass, barnyard grass, lambsquarter, ragweed, velvetleaf and other hard-to-kill annual grasses and broadleaf weeds. **Easy to use.** New Dyanap mixes easily in water with minimum agitation. And stays mixed so it won't clog applicator nozzles. Spray it on, Dyanap does its work and disappears, leaving no residue to harm the following crops. See your dealer for new Dyanap.
