Sunday Fellowship Enjoys Supper at Home of Gibsons

On Sunday afternoon, July 10, at six o'clock Mr. and Mrs. Ray Gibson entertained the Sunday Evening Fellowship of Maysville Methodist Church at a lawn supper at their home in Maysville.

Assisting as hostesses were Mrs. A. H. McDaniel and Misses Clara Foscoe and Yetta Brock. Mr. and Mrs. Gibson's grandchildren, Paul and Joyce Gibson are visiting their grandparents and were present for the occasion.

Rotarians Install Officers and Hear Jim Butler Talk

On July 5, Maysville Rotary Club began a new year on the regular meeting night, Tuesday, at 7:00 p.m. The program began with dinner followed by an address by Dr. James W. Butler, Director of Publicity for East Carolina College, who is also a Past District Governor of Rotary.

Dr. Butler then installed the new officers for the year. Following his installation as president, Don W. Mattocks outlined the program for the year and charged the officers and members with responsibility for the year's activities.

Officers for the coming year are: President, Don W. Mattocks; Vice-President, Bill R. Cotton; Secretary, Bobby Barbee; Treasurer, Robert L. Mattocks; Director of Club Service Activities, Elwood Morris; Director of Vocational Service, Clint W. Lancaster; Director of Community Service, Milan LaRoque; Director of International Service, Randolph Mills, Jr.

BAPTIST SUPPER

Supper was enjoyed by all members of First Baptist Church of Maysville Family Night. After the supper The Women's W. M. S. held their monthly meeting. Mrs. Zane Horrell presided in the absence of the president Mrs. Harold Brown. Mrs. David Adams presented the program titled Baptist in Spain & Portugal. Mrs. Ray Banks assisted in the program.

Mrs. Roy McPeak entertained her Sunday School class of First Baptist Church's Intermediate Girls recently. Cake and punch was served to the following members, Kathy Jones, Lois Jones, Sudie Batchelor, and Doris Evans.

Mrs. C. C. Dameron Hostess to Circle

The Lillian Foscoe Circle of Maysville Methodist Church met Monday morning at the home of Mrs. C. C. Dameron.

The meeting was opened with the singing of the hymn "More Like The Master." Mrs. I. S. House gave the devotional, closing with prayer.

The title of the program was "A Way with Children," was presented by Mrs. Mollie Pelletier, Mrs. R. N. Knight, Mrs. C. C. Dameron, Mrs. Eva Mattocks, and Mrs. I. S. House. Mrs. Eva

Mattocks closed with prayer. Refreshments of cake and ice cream floats were served by Mrs. Dameron.

WSCS Meets on Tuesday at Church

The Women Society Christian Service of Maysville Methodist Church met at the church Tuesday night.

Mrs. Thelma Foscoe and Mrs. Beatrice Gibson presented the program titled "Automation." The devotional was taken from the Upper Room.

Mrs. Don Hare and son Eric and Mrs. Lollie Collins of Jacksonville visited Mr. and Mrs. Harry Collins and Mrs. Hubert White.

Mrs. Charlie Benson and son of Miami, Fla., Mrs. Myrtle Royal and daughter of Rocky Mount, and Mr. and Mrs. Fred Parker and children are visit-

Suddenly Sobered

James M. Owens, a migratory tobacco worker, blamed his presence in an unauthorized Pink Hill home on "bad likker," when the occupant of the home opened up — with very poor aim — and began shooting in Owens' direction the sobering was instant and Owens either outran or dodged all aimed in his direction. He was apprehended and charged with not only breaking into the home but also with peeping into a window of the home.

Summer School

The second semester of summer school at Jones Central High School, will begin Monday, July 18th at 6 p.m. Courses offered are English 1, English 11, English III, English IV, U. S. History, Algebra I, Algebra II, S. History, Algebra I, Algebra II, Biology, World History. Classes are from 6:30 till 10 nightly, Monday thru Friday.

Saturday Drowning

Fifteen year-old Albert Miller Jr., who lived with his grandfather Lonnie Miller on La Grange route 1 was drowned in a farm pond Saturday afternoon. Miller was bathing with another teenaged boy when he disappeared beneath the waters of the pond near Mewborn's Crossroads. Efforts to rescue him failed and his body was recovered about an hour later by members of the rescue squad of the Kinston Fire Department.

Corn Development at Purdue Receiving Major Attention

One of the most significant advances in American agricultural research since the development of hybrid corn four decades ago has been made by scientists at Purdue University.

Purdue researchers have announced the development of a new type of corn with a better quality protein than that in varieties currently produced commercially.

The new type, called high-lysine corn, makes pigs grow more than three times faster than pigs fed regular hybrid corn. Even more significant are experiments involving children in Guatemala, which disclosed that the protein value of high-lysine corn is equivalent to that of skim milk.

Guatemala, a country of hungry people, depends upon corn to furnish 70 percent of the average citizen's protein. On the basis of experiments thus far, Purdue scientists are enthusiastic about high-lysine corn offering better diets for millions of hungry people in underdeveloped countries.

A. D. Stuart, extension corn specialist at North Carolina State University and a member of the Tar Heel delegation recently attending the high-lysine confer-

ing in town, their home place. Mr. and Mrs. Bill Morris and Craig spent last week with their daughter and her husband, Mr. and Mrs. Pollard Cannon at Hampton, Virginia.

Mrs. Ida Pearl Kinlaw of Elizabethtown spent a few days with Mr. and Mrs. J. E. Mitchell and Miss Alma Mattocks.

ence at Purdue, says the new type of corn is the product of research for nearly a decade. Its concentration of lysine, an essential amino acid, is twice as great as regular hybrid corn.

According to the specialist, the new type which is also called opaque-2, contains a gene for the greater amount of lysine. It has soft starch and appears to have lower yields of grits and meal.

Stuart points out that the discovery of the new corn variety has motivated other scientists to look for high-lysine contents in other grain crops. One such crop is Atlas 66 wheat which was grown in the Tar Heel state several years ago.

North Carolina grain producers will have to wait several years before trying the new variety. Stuart says it will probably take five or six years to incorporate the lysine genes into our popular hybrids.

With the latest development scientists are optimistic about corn, already one of the nation's most valuable crops. It is not only one of the biggest crops in terms of quantity and financial return to farmers in the United States, but also the basic feed for our multi-billion dollar meat animal and dairy industries.

Products of corn have more uses in both food and nonfood industries than those of any other crop. Corn products go into automobiles, airplanes, missiles, medicines, metals, paper, petroleum, rubber, ships, textiles, military uniforms, mess kits, and even organdy wedding gowns.
