* Allocation per pupil.

This table needs no comment, except to remind that this is the proposed budget for the 16 institutions of higher learning operated under the supervision of the North Carolina Board for Higher Education. This is a reflection of the "unbiased" effort of this board to spread higher education "fairly" in North Carolina, and it further reflects no material change in their budget attitude over the 12-year history of this supervisory group. Eastern North Carolinians might take note of the fact that the lowest allocation per student go to East Carolina College, Wilmington College, Pembroke College — all in the eastern end of the state, and West Carolina College in the extreme western end of the state.
