Short Takes

Ravenscroft exceeds goal
Ravenscroft School in Raleigh has raised \$5.15 million in a three-year capital campaign, exceeding its goal of \$5.07 million. The money will fund a new fine arts center, provide faculty support, assist the annual fund and help pay campaign expenses.

School ends campaign
St. Timothy's Middle/Hale High School in Raleigh raised \$600,000 to pay for a new education building, exceeding its \$500,000 goal.

Teacher gets chair
Ann Overton, a first grade teacher at Ephesus Elementary School in Chapel Hill, is the first recipient of the Phyllis Sockwell Chair for Excellence in Elementary Classroom Teaching. The award, which has an annual cash prize of \$1,000 for two years, is given by the Chapel Hill-Carrboro Public School Foundation

Foundations gets grant
The Chapel Hill-Carrboro Public School Foundation has received a three-year, \$75,000 grant for training teachers and administrators. The grant, from the Mary Whiting Ewing Foundation Inc., will provide training at the Efficacy Institute in Lexington, Mass.

Foundation buys TV time
The Robert Wood Johnson Foundation in Princeton, N.J., is paying NBC News \$3.5 million for two hours of prime time that will be devoted to a discussion of health-care reform. NBC News will be responsible for the content of the discussion, to air June 21 at 9 p.m. A week before the grant was announced, *The Wall Street Journal* reported that members of a physicians' group had criticized the foundation for making nearly \$150 million in grants for health-care research that supports the foundation's "liberal agenda favoring man-

aged care."

Harvard raising \$2.1 billion
Harvard University has set a five-year campaign goal of \$2.1 billion in what it says is the largest fundraising drive in higher-education history. Pledges so far total \$600 million. In addition to supporting faculty, students, facilities and programs, the campaign is designed to help unify the university's diverse schools and programs.

Babcock grant questioned
The Wall Street Journal, in an editorial, has questioned grants by a handful of foundations, including the Mary Reynolds Babcock Foundation in Winston-Salem, to Food & Water. Saying the organization opposes irradiation, the editorial questions Food & Water's scientific legitimacy and suggests its foundation supporters should do a better job of checking out their grantees.

Burroughs Wellcome Fund names president

The Burroughs Wellcome Fund has named Enriqueta "Queta" C. Bond, executive officer of the Institute of Medicine in Washington, as its new president. The presidency, which has been held by a volunteer presiding over the foundation's board of directors, is being redefined as the foundation's top executive job. Bond, who begins work July 11, takes over as the Burroughs Wellcome Fund is absorbing a \$400 million gift from its sister foundation, the Wellcome Trust in England. That gift, payable over five years starting in 1993, will increase the fund's assets to \$500 million and its annual grant-making to \$22 million by 1997. The Fund also is spinning itself off from Burroughs Wellcome Co. in Research Triangle Park. Bond has an undergraduate

degree in zoology and physiology from Wellesley College, a masters degree in biology and genetics from the University of Virginia and a doctorate in biology and biochemical genetics from Georgetown University. The Institute of Medicine is a nonprofit operating under the charter of the National Academy of Sciences in Washington. Bond succeeds Howard Schaeffer, retired vice president for research, development and medical at Burroughs Wellcome. He will become chairman of the foundation's board. Martha Peck, the fund's executive director, will continue in her position, reporting to Bond.

Enriqueta C. "Queta" Bond
