

**BETHEL HILL SCHOOL NEWS**

The speakers who will represent Bethel Hill High School in the contest of the High School debating union of North Carolina, were chosen Thursday morning when a preliminary debate was held in the school auditorium. Annie Mae Brandon, Hazel Jones, Jennie Crutchfield, and Elvin Tuck were the speakers selected, with Allen Dixon and C. L. Perkins as alternates.

Bethel Hill High School is in a triangle with Wilton and Rolesville. The triangle debates will be held on March 27. The query for discussion being, Resolved, That the several States Should Provide for the Socialization of Medicine.

The P. T. A. will meet Monday night, March 2, at 7:30 p. m. in the school auditorium.

School remained closed for a short period due to snow and bad roads. Trucks are now running regularly. We urge all patrons to send their children to school every day.

**HIGH - CLEARANCE WHEELS ON NEW CHEVROLETS NOW**

Made for Use in Counties Where Roads Are Bad and This Type Needed.

New Standard models equipped with 19-inch wheels, two inches larger in diameter than the regular wheels, have been made available to purchasers by Chevrolet Motor Company to provide extra road clearance for cars to be used largely on unimproved highways. The

extra clearance is in demand by such users as rural mail carriers, owners of farms located off main highways, sheriffs and deputies in undeveloped regions, and others whose duties require them to traverse unimproved roads.

W. E. Holler, vice president and general manager, pointed out that the rapid extension of improved highways, by tapping more and more unimproved feeder roads and lanes that are deeply rutted in certain seasons, serve to create a market for the high-clearance wheels. The extra clearance also is to advantage in northern regions where the annual snowfall is so great as to impede the progress of cars with normal clearance.

**MRS. JANE ANDREWS DIES AT TIMBERLAKE**

Funeral Services for Person County Native Will be Held Monday Afternoon.

Mrs. Jane Cash Andrews, widow of John Andrews, of Timberlake, died at her home there early Sunday morning following an illness of several months.

Mrs. Andrews, the daughter of the late Monroe and Mahalie Cash, was born in Person county in 1859. She was a lifelong resident of the county and a member of Helena Methodist church since early childhood.

Funeral services were held at the home Monday afternoon at 3 o'clock. Rev. B. H. Black and Rev. H. E. Lance officiated. Burial was made in Andrews cemetery.

Surviving are three sons, E. W. Andrews, H. C. Andrews and J. G. Andrews, all of Timberlake; four daughters, Mrs. Lizzie Bowen and Mrs. L. M. Burton, of Rougemont, and Mrs. F. L. Gamble and Mrs. R. H. Wilson, of Durham; three brothers, Monroe Cash, Charlie Cash, and Moses Cash, of Timberlake; two sisters, Miss Vannie Cash, of Timberlake and Mrs. Nannie Burton, of Rougemont; and 12 grand children.

**ELECTRIFICATION MEETING IN THIS COUNTY MARCH 3**

May Lead to Establishment of Several Lines in Person County.

There will be a meeting in the Courthouse on the afternoon of March 3rd, at 2:30 p. m., in the interest of securing all possible information and data which may lead to the establishment of rural electric lines in Person County.

A number of our citizens in different neighbors have been discussing the possibility of such lines for several months. Tentative surveys have been made and a large map of Person County has been drawn showing all proposed lines and the data on them. Mr. D. E. Jones, Assistant Rural Electrification Specialist, of State College, Raleigh, N. C., will bring this map to the meeting and discuss it with all interested citizens.

The nature of the meeting will be a discussion of Rural Electrification in a general way, and to point out the methods the people may follow to obtain "feasible" lines.

Keep this date in mind, and come to the meeting at the Courthouse at 2:30 p. m., Tuesday, March 3rd.

Twelve additional farms have been selected in Jackson County for farm management demonstrations in cooperation with the TVA.

Lime and lespedeza will be used in Macon County this season in starting the new soil building program.

**FARM QUESTIONS ANSWERED**

Question: Is barley a satisfactory poultry feed?

Answer: This grain is an excellent feed, although not as palatable as corn or wheat. Experimental work indicates that barley can be substituted for yellow corn in the chick ration provided a liberal supply of alfalfa meal is added to supply the necessary vitamin "A." Without the alfalfa meal, however, this substitution should never constitute over thirty percent of the grain ration.

Question: What feed should be given the ewe just before lambing time?

Answer: During severe weather or when grazing is not available, each ewe should receive about two pounds of good legume hay each day. Oat hay, corn fodder, bright straw or grass hay may be used in larger quantities if legume hay cannot be obtained, but timothy hay should never be fed to sheep. A small grain ration consisting of one-half pound of corn and oats, or corn alone, should be fed daily to ewe for three or four weeks before lambing, providing the legume hay is used. Otherwise the grain ration should contain between 30 and 35 percent cottonseed meal or linseed oil meal.

Question: Can winter hay crops be grazed in the spring and still make a good crop of hay?

Answer: All early-sown hay crops can be grazed lightly during the month of March without serious injury. Grazing, however, should be discontinued by April 1, if a full

crop of hay is desired. This will leave ample time for the crops to mature before the hay is cut. Small grains are cut for hay when in the dough stage and legumes are cut when in full bloom.

A twenty-ton car of TVA superphosphate was unloaded in Alamance County last week to be used on the farms selected for farm management demonstrations.

**NO UPSETS**

The proper treatment for a bilious child

ANY mother knows the reason when her child stops playing, eats little, is hard to manage. Constipation. But what a pity so few know the sensible way to set things right! The ordinary laxatives, of even ordinary strength, destroy all hopes of restoring regularity. A liquid laxative is the answer, mothers. The answer to all your worries over constipation. A liquid can be measured. The dose can be exactly suited to any age or need. Just reduce the dose each time, until the bowels are moving of their own accord and need no help. This treatment will succeed with any child and with any adult. Doctors use a liquid laxative. Hospitals use the liquid form. If it is best for their use, it is best for home use. The liquid laxative they generally use is Dr. Caldwell's Syrup Pepsin. Any druggist has it.

**WINE WITH SELTZER**

Another wine drink fast becoming popular is that which many smart hostesses serve, namely, wine with seltzer water. Any type of dry wine will suffice. To prepare it, pour one and one half figgers of wine into an ordinary sized tumbler or goblet and fill with seltzer water. Add a piece of lemon peel. The drink is very similar in taste to champagne.
