

## BARBARA STANWYCK DUE IN 'RED SALUTE'

Special Show at Palace Saturday Morning 10:30, Saturday Night 11:30.

Following an absence of six months, during which she took a week earned rest, Barbara Stanwyck returns to the screen in the Reliance comedy, "Red Salute," which begins a one day run at the Palace Theatre on Saturday.

Barbara is no longer under contract to one studio, and in future will select her own starring vehicles. She feels it will be much more interesting to work for various companies, primarily because of the opportunity to play diversified roles.

An opportunity of this nature was offered her by producers Harry M. Goetz and Edward Small in "Red Salute," and she readily accepted the assignment. Instead of her familiar strong emotional roles, Barbara plays a light, breezy, romantic comedy part as Drue Van Allen, a tempestuous college girl with a flair for bizarre escapades. She is quick-witted, trigger-tongued, but with a loveable creature, as Robert Young, in the role of a young buck private, discovers in the course of a fast-moving series of amusing difficulties that ensue when they are stranded together across the Mexican border.

Hardie Albright, Ruth Donnelly, Cliff Edwards, Gordon Jones and Paul Stanton head the supporting cast of this rollicking comedy, which Sidney Lanfield directed.

The screen play was prepared by Humphrey Pearson and Manuel Seff from an original story by the former. "Red Salute" is released through United Artists.

### N. & W. News Items

Employees of the Norfolk and Western Railway made the best safety and accident prevention record during 1935 in the entire history of the railroad, according to the annual statement issued by C. H. Blakemore, superintendent of the Safety Department.

The casualty rate for the year was 4.54 per million man-hours worked, an improvement if 13 per cent over 1934 and 90 per cent over 1912, when the safety movement was established on the railroad.

"This means," the statement points out, "that the average Norfolk and Western employee is 90 per cent safer in his work today than he was some 20 years ago. In short, so safety-conscious have employees of the railroad grown to be, that on an average, a man would have to be on duty or work continuously for 88 years, to allow time for the occurrence of just one accident."

The best division record of the year was made by the Shenandoah Division with a casualty rate of only 3.75 per million man-hours worked. The Scioto Division was second with a record of 4.64. The Norfolk General Agency took first place among the terminals of the railroad with a casualty rate of 6.34.

Perfect records were made by nine line shops and eight departments of the Roanoke Shops, the engineering and stores department. The Portsmouth (Ohio) Shop employees worked a total of 2,431,782 man-hours without a single reportable accident. Other line shops which made perfect scores were: Shafter Crossing (car department), Bluestone, Clare, Bristol, Echman, Petersburg, Norton and Kimball. Departments of the Roanoke Shops which came through the year without a reportable accident were: passenger, boiler, foundry, freight, sheet iron and pipe, paint, wheel and tank, and frog.

## FARM QUESTIONS ANSWERED

Question: How can I keep my cows from eating wild onions?

Answer: There is no way except to keep them off pasture. However, the objectionable flavor and odor of onions can be eliminated by taking the cows off the pasture and given dry feed for at least six hours before milking. Be sure that no highly flavored feed, such as rye and turnips are fed before milking as these feeds will also impart an objectionable flavor. With these precautions the milk or cream should be rid of the odor and flavor of onions or other feeds and rendered saleable.

Question: What equipment is necessary when placing baby chicks in the brooder?

Answer: Drinking fountains and mash hoppers are the two main essentials. For each 100 chicks two drinking fountains of one-half gallon capacity and one mash hopper five feet long should be provided.

### Getting Up Nights

If you suffer from Getting Up Nights, Nervousness, Leg Pains, Swollen Joints, Dizziness, Headaches, Loss of Pop, Burning, Smarting, Itching Acidity due to try the Doctor's guaranteed prescription **Cystax** (Sis-tax). Must bring new vitality in 48 hours, and satisfy completely in 8 days or money back. Guaranteed Cystax costs only 30¢ a dose at druggists.

When the chicks are three weeks old two mash hoppers five feet long, six inches wide, and four inches high are required. These hoppers should be equipped with a reel and kept filled at all times with the growing mash.

Question: Will potatoes that have discolored or brown centers produce good plants?

Answer: Yes. This is what is known as an internal break down. The center cells become discolored and cause the potatoes to have a bitter, unwholesome taste. However,

The disease is not caused by an organism and therefore there is no germ present that can be transmitted to the plant and the potatoes will produce good plants. Early transplanting on light sandy soil and the use of potash fertilization will, in some cases, correct the trouble. Avoid the use of fertilizers carrying excess nitrogen.

**Chevrolet's**  
high-compression valve-in-head engine  
gives economy without equal!

FOR ECONOMICAL  
TRANSPORTATION  
**CHEVROLET**

Every test proves it's more economical . . . Every Chevrolet owner knows it's more economical . . . And every person will readily understand these simple A-B-C reasons why it is more economical

The Chevrolet engine is the most economical automobile engine produced today, because (1) it is a six-cylinder engine, and (2) it is a valve-in-head six-cylinder engine.

Its valve-in-head design cuts gasoline consumption still lower because there is less loss of heat through the walls of the combustion chamber in valve-in-head engines, and the advanced construction of the Chevrolet engine gives maximum heat (or power) saving.

## CHEVROLET

A GENERAL MOTORS VALUE

Its six cylinders use less gas and oil—in fact, use the least gas and oil—for six cylinders are the most economical combination used in modern automobiles.

NEW PERFECTED HYDRAULIC BRAKES . . . IMPROVED GLIDING KNEE-ACTION RIDE\* . . . SHOCKPROOF STEERING\* . . . GENUINE FISHER NO DRAFT VENTILATION . . . SOLID STEEL one-piece TURRET TOP BODIES . . . HIGH-COMPRESSION VALVE-IN-HEAD ENGINE . . . 6% NEW MONEY-**\$495** AND UP. List price of New Standard Coupe at Flint, Michigan. With bumpers, spare tire and tire lock, the net price is \$50 additional. \*Knee-Action on Master Models only, \$30 additional. Prices quoted in this advertisement are list at Flint, Mich., and subject to change without notice.

Most important of all, Chevrolet's more efficient cooling system, pressure stream oiling and the greater accessibility of all working parts result in more dependable operation, over a longer period of time, with the lowest maintenance costs. Thus, Chevrolet's valve-in-head engine —only one of its kind in Chevrolet's price range—gives economy without equal.

### One Thousand Reasons

There are thousands of reasons why you should insure, and one of the best is that no man can read into the future. Insurance protects. Do you need protection?
