\$50,000 VOTED FOR TOWNSEND INQUIRY

Action Taken Despite Protest Money Will Be Used To "Stuff Rat Hole."

Washington, March 16—The special bi-partisan committee investigating the Townsend and other old-age pension plans was given \$50,000 expenses by the house today over protests that the amount was "grossly excessive" and was like "stuffing \$50,000 down a rat hole."

There was no record vote on adoption of the expense resolution. A roll-call vote on the question of whether amendments should be allowed—tantamount to passage—was 243 against and 113 for.

Chairman Bell (D., Mo.) of the investigating committee defended the request for \$50,000 and declared the Townsend organization constituted "the most far-flung political movement ever on the stage of American politics."

Representative Monaghan (D., Mont.) chairman of the house Townsend steering committee, attempted to block consideration of

THROUGH THE AGES

A mountain of rock may seem everlasting, yet year after year it is worn away by natural elements which leave deep crevices as evidence of their great power... smoothing the rock's surface in the process of slow destruction. So is Life worn away... and the sorrow of loss may be smoothed by the knowledge that all that is humanly possible has been done to make the last journey a rite of beautiful reverence.

{ QUESTIONS THAT ARE ASKED ABOUT BANKING }

"What is meant by a Bank's capital and surplus?"

The "capital" of a bank is the amount of money the stockholders have invested as owners of the bank. The Federal and State governments have minimum capital, and frequently subscribed surplus, requirements that must be met before a bank charter is issued.

In addition, the "surplus" of a bank is built up, usually out of earnings set aside to increase the protection of depositors. In addition, there are reserves for meeting known liabilities or guarding against contingencies.

The capital, surplus and undivided profits constitute an element of protection to a bank's depositors which supplements its policies of sound, honest management in safeguarding the funds entrusted to its care and applying them in useful loans and investments.

the resolution on points of order. He was overruled by Speaker Byrns after the Montanan tried repeatedly to open the entire question of the resolution. Monaghan contended the house could not act intelligently without the facts and backgrounds.

"The chair has nothing to do with whether the house can act intelligently," answered Byrns, "that is up to the house."

When Monaghan said "tricky procedure" was used to secure adoption, Byrns sharply warned that members "must refrain from personalities while engaged in debate." Monaghan withdrew the remark.

Chairman Warren (D., N. C.) of the accounts committee which reported the expense resolution said it was pursuant to the expressed will of the house and had nothing to do with the merits or demerits of the Townsend program.
