## DAISIES DEAL DEATH TO FLIES

One Whiff Causes Nervous Breakdown, Starvation.

Strange as it may seem, a beautiful red daisy closely related to our common field daisy with its orange disc center and white petals (she loves me—she loves me not) is the deadliest enemy of house flies, mosquitoes, moths and other perennial pests. Contact with this colorful field flower instantly gives the insects a nervous breakdown (no fooling!) and within a few seconds, unable to forage for food or water, they starve to death.

"Pyrethrum," scientists call the deadly daisy essence, which they now use as a powerful killing constituent in insect spray. And today, when flies, roaches, moths or what-nots get on the harassed housewife's nerves she goes them one better. She flies for the spray gun and gives the flies a wife and deadly case of nervous prostration.

It was Jugo-Slavish hausfrau who accidentally discovered the insect-killing power of the pyrethrum daisy when she picked a bouquet of the bright red flowers and put them on a table in the house. Later she noticed a great number of dead insects around the withered bouquet. Subsequently, small European manufacturers ground the flowers into a fine powder and distributed it about the Continent as a dust to be blown at insects by means of small bellows. More recently, pyrethrum daisy growing has become an agricultural industry in various countries and the Gulf Oil Corp. of Penna. — Gulf Refining Co. imports vast quantities of the death-dealing

yellow dust for use in its insect sprays.

According to Dr. William A. Sim-nation, entomologist at Gulf's Research Laboratories, the killing action of pyrethrum is very rapid, when mixed in proper quantities with an especially refined hydrocarbon carrier and sprayed as a fine mist into a room or cupboard.

When the fine mist comes in contact with an insect, it penetrates into the insect's nervous system, destroying the nerve cells, causing paralysis. Within a few seconds death

results from starvation. The organs and functions of insect bodies are decidedly different in many respects from those of the human body and those of animals and birds. Hence pyrethrum, so deadly to flies, mosquitoes, roaches, moths and other insects and their larvae, has no effect on human beings or their pets.

So if the dog or the cat or "the old man" gets on the housewife's nerves, the Gulf spray gun won't do much good.

## Why Gulf is the Gas for April

"APRIL SHOWERS bring May flowers." And warmer weather, too. That means a brand-new gasoline is shipped to Gulf stations—a gas especially made for April driving. For unless gasoline is changed to meet Spring's higher temperatures it can't give the highest mileage. Get That Good Gulf—it's "Kept in Step with the Calendar" so that all of it goes to work, none of it goes to waste.

**"Kept in Step with the Calendar" THAT GOOD GULF GASOLINE**

Owners of Holstein cattle recently reorganized the Holstein Breeders Association of North Carolina.

C. D. Branch of Columbus County through feeding corn to his hogs and selling the animals realized a greater profit from his grain than if he had sold the corn outright. It brought him \$1.50 a bushel under this method.

Strawberry growers in Duplin County are busily engaged in strapping their plants and in cleaning their fields in preparation for the annual harvest. The first berries are expected by April 15.

## Ford - FOR ECONOMY

"The Ford V-8 uses less fuel and oil for the power it gives than any other car we have ever made

### AND ITS UP-KEEP COST IS THE LOWEST

ENTHUSIASTIC sales talk often begins and ends with gasoline mileage. Some salesmen would like you to believe it is the whole story of automobile economy. But drivers ought to know better. For, the fact is, it's way down the list.

The big items of car economy are low first cost, low up-keep cost and low depreciation. Savings here can make a great deal of difference in cost per mile. Gasoline mileage is more of a talking point than an economy factor.

Check up and you will find that the difference between 17 and 19 miles a

gallon is less than \$10 for a whole year's average driving (8400 miles at 18 cents a gallon). Here are the big items that make the Ford the most economical car: More value for every dollar you pay. Lower cost for repairs and service. Long life. Slow depreciation.

Quality means economy and the 1936 Ford V-8 gives you more real quality than any other low-price car. No other car under \$1645 has a V-8 engine. No other low-price car has Center-Poise Riding, safe, sure mechanical brakes and Safety Glass all around at no extra cost.

**\$25 A MONTH** WITH USUAL LOW DOWN-PAYMENT, BUYS ANY NEW FORD V-8 CAR ON NEW UCC 1/2% PER MONTH FINANCE PLANS.

We Will Be Glad To Show You Any Ford Model
