DODD SAYS WORLD DRIFTING INTO WAR

U. S. Ambassador To Germany Speaks At W. C. U. N. C. Graduation Exercises.

Greensboro, June 1—Dr. William E. Dodd, U. S. Ambassador to Germany, told the graduating class of Women's college of the University of North Carolina today that "the war menace has become more dangerous with each passing year."

He said the world was drifting toward war because "the peoples of western Europe and the United States have not learned the essentials of their history" and the powers' inability to achieve a "real understanding of democracy."

"There is no hope," he added, "unless the press of the democratic countries tell their people the whole truth; unless universities, colleges and high schools teach the young what has happened the last half century and what it means to have two-thirds of the population living in cities; and, finally, unless all civilized peoples unite to prevent arbitrary annexations of peaceful countries."

Mr. Dodd had as his subject "The Dilemma of Civilization" and delivered the address to 244 members of the graduating class and hundreds of other auditors at the closing program of the 44th commencement of the institution.

Ambassador Dodd, a native of Clayton, N. C., was presented by President Frank P. Graham, of the university. Dr. W. C. Jackson, dean of administration at Woman's college, presided over the exercises and presented to Dr. Graham candidates for degrees, of which 162 were the degree of bachelor of arts; 24 that of bachelor of science in home economics; 11 the degree of bachelor of science in physical education; 40 the degree of bachelor of science in secretarial administration, and Dr. Wade R. Brown, dean of the school of music presented the seven candidates for the degree of bachelor of science in music. Degrees conferred numbered 244.

QUESTIONS THAT ARE ASKED ABOUT BANKING

"Why don't banks pay interest on checking accounts?"

MOST of the banks of the country (14,123 which are members of the Federal Deposit Insurance Corporation) are prohibited by law or government regulation from paying interest on "demand deposits." Checking accounts are, of course, demand deposits, for they may be withdrawn at any time by the depositor.

It is now generally recognized that the payment of interest on demand deposits is not sound banking practice. A bank must be prepared at all times to pay out these funds on demand. Consequently, the bank cannot make full use of this money because it does not know when the depositor may want to withdraw it.

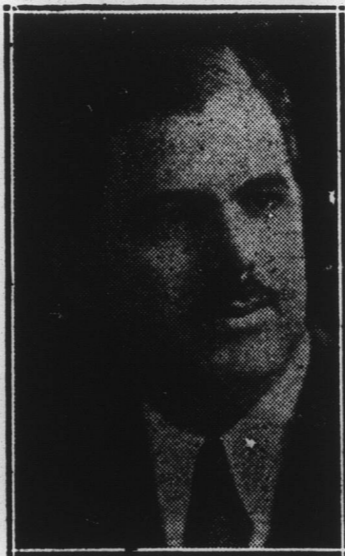

A checking account is primarily for the convenience of customers for keeping their money and writing checks. For those who wish to receive interest their funds can be placed in interest-bearing time deposits.
