

CHANCELLOR HITLER DEMANDS THE RETURN OF GERMANY'S LOST COLONIES

In a speech before nearly 500,000 Nazi workers and Storm Troops, the Reich Chancellor demanded the return of Germany's colonial possessions divided among the Allies at the end of the World War. Here are the former colonial possessions of Germany and, indicated by flags, the nations among which they were apportioned by the Treaty of Versailles. "Germany," he cried, "will never relinquish her insistence on a solution of her colonial demands."

**LEAF FREE FROM NICOTINE IS MADE**

German tobacco dealers state that there is practically no nicotine-free tobacco left from the 1934 crop, and that the 1935 crop now undergoing fermentation will not be available until late in 1936. Prices obtained for nicotine-free tobacco averaged between RM 1.00 and RM 1.20 per German pound. The German pound equals 1.1 American pounds.

Morris Saches of St. Louis was freed from a speeding charge when he complained that the policeman had to borrow his pencil to make out a summons.

**You Cannot Down Facts**

And it is a fact that the Roxboro tobacco market year in and year out has officially averaged with the highest. And another thing; Wilburn & Satterfield does not play second fiddle when it comes to quality merchandise. Good Clothes, Good Shoes, Good Hats, Good Shirts and just the kind of things you love to wear. It will pay you in the long run to sell your tobacco in Roxboro and trade with us. TRY IT.

IT WILL PAY YOU TO TRADE WITH US — TRY IT.

**CANDLING IS USED TO DETECT EGGS NOT GOOD FOR FOOD**

Makes it Possible to Detect Eggs Containing Blood Spots.

Candling consists of holding an egg at an angle of 45 degrees, large end up, and twirling it before a light which is placed behind so that it will shine through a circular opening; an arrangement that virtually constitutes a candle, states a writer in the Los Angeles Times.

By looking at the egg toward this light, working in darkened quarters you can determine the interior quality. You can check the size of eggs unfit for food.

The air cell, the shadow of which you can see when candling, is an air space usually found at the large end of the egg. It is about the size of a dime when the egg is cooled. Since the egg shell is porous, evaporation occurs inside the egg and the air cell increases in depth as the contents of the egg decreases in volume.

Mrs. R. M. Beasley and Misses Lelia and Bea Beasley, of Apex, spent the week-end here visiting Mr. and Mrs. B. B. Strum.

Mr. Phillip A. Terry was a Durham visitor Saturday.

**TWO SPEAKERS AT CENTRAL SCHOOL**

Rev. West Present on Sept. 21 and Rev. Lee on Sept. 28. Both Talks Enjoyed.

During the past two weeks Central school has been greatly favored by having two visitors to conduct the devotional exercises for chapel. Each visitor brought very worthwhile and inspiring messages.

On September 21, Rev. W. F. West came for his first visit this fall and everyone was delighted to have him for he always brings some good message in the form of an object lesson and even the small children were able to understand and appreciate its meaning.

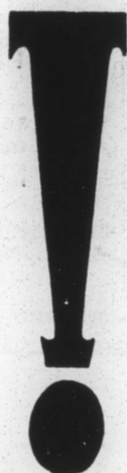

By the use of the parts of a small clock he taught a wonderful lesson of cooperation.

May we think of the parents as the works, the child as the face, and the teacher as the hands of a great clock. If there is perfect cooperation of all the results will be glorious.

Last Monday, September 28, Mr. Lee, pastor of the Brooksdale Methodist church was with us, and in his usual efficient way, brought teachers and pupils a very impressive lesson on "Obedience as the Means to Complete Happiness and Success." He urged all to fully and completely love and obey parents and teachers in every duty requested of them and in that way he assured of success in every phase of life, and through this success will certainly come complete and full happiness.

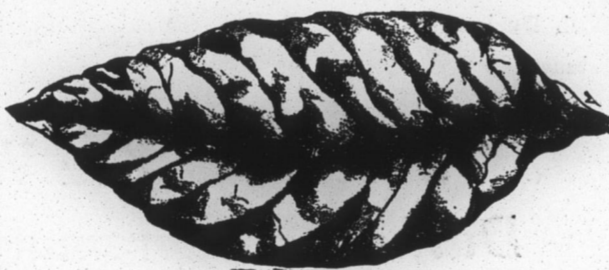

If we stop to think we will agree with Mr. Lee in the fact that absolutely no degree of happiness can be ours through disobedience.

Every hearer enjoyed and appreciated these helpful lessons brought by these two friends of our schools and we are looking forward to their next and continued visits.

**"GOOD NEWS"**

High Tobacco Prices and Cheap Electricity!

It is GREAT news for everyone that tobacco is bringing higher prices this year. It means increased prosperity for all — and to many tobacco growers it will mean an opportunity to enjoy the comforts and conveniences of CHEAP ELECTRICITY, which rural electrification is rapidly making available to farm homes.

As rapidly as possible, and circumstances permit, the service facilities of this Company are being extended into various rural communities, thus opening the way for thousands of rural homes to enjoy the many and varied uses of CHEAP ELECTRICITY.

CHEAP ELECTRICITY brings to the rural home, as well as the urban home, a new era of BETTER LIVING, making possible the enjoyment of such conveniences as Electric Cooking, Water Heating, Refrigeration, etc., at a cost much less than that of old-fashioned methods.

CHEAP ELECTRICITY brings to the farm a practical means of modernizing operating methods — of saving time, labor and money — and of increasing the productivity of effort, reducing operating costs and promoting larger profits.
