

BEST TURKEYS SHOULD BE KEPT

High turkey prices during the Thanksgiving and Christmas holidays often tempt producers to sell their best birds and keep slower developing turkeys for breeding purposes.

That's about the worst thing they could do, commented C. F. Parrish, extension poultry specialist at State College.

Now that the holiday seasons are not far off, he said growers should classify their birds into three groups: breeders, market turkeys, and culls.

Although the very best birds should be saved for breeders, there will be many good birds available for marketing, and growers should make every effort to get their market birds in good condition, Parrish pointed out.

Turkey meat is considered somewhat of a luxury, he added, and therefore quality birds will command higher prices than other meat products of the same food value.

Early hatched, well developed, quick maturing pullets and young toms are given first preference. Consequently, these should be the type selected for breeders. Breeders should also be healthy, active, well balanced, and free from deformities.

The market turkeys should be divided into two groups, one for Thanksgiving and one for Christmas.

In the first group place healthy birds that have large frames, are reasonably free from pin feathers, and appear ideal for marketing late in November. Confine them in a place that is not too restricted and feed them a fattening ration.

Smaller, timid, slow developing birds should be placed in the second group, where they will have a longer time to develop before being placed on the market.

N. C. GOOD FOR HOG RAISING

State Has Many Advantages and is Near Market.

North Carolina is well adapted to hog production, according to Earl H. Hostetler, professor of animal husbandry at State College.

The State has many advantages, he said, and three are particularly outstanding: temperate climate, nearness to market, and a good supply of protein supplements.

In the temperate climate, each

"MASS OF MUSCLE" READY FOR ACTION

That is the nickname of Martin Levy, huge Boston wrestler, whose 6 ft. 1 in. tip the scales at 625 pounds. At his birth, 27 years ago, he weighed 8 pounds. Four brothers and four sisters are of normal physique.

cow can farrow two litters of pigs each year without her owner having to provide expensive housing during these critical periods.

However, some housing is necessary, Hostetler said, to protect them from the cold and rain in February and March and from the heat in August and September, the two best farrowing periods.

From practically any place in eastern North Carolina, he continued, hogs can be shipped to Richmond or Baltimore in 36 hours or less, and this is a distinct advantage.

Producers living farther away from the markets have to pay more transportation charges, and the hogs undergo heavier shrinkage in transit. Eastern markets also pay higher prices than those in Chicago.

Corn is the cheapest and most satisfactory carbonaceous feed for fattening hogs, and plenty of corn is available in this State. Last year, more than one-fourth of North Carolina's crop land was in corn.

To get the best results in feeding some nitrogenous or high protein feed must be fed with the corn. And

SWEET POTATOES SHOULD BE COVERED

Better to Cure and Store Them if You Want a Good Price.

"If you want to get a good price for your sweet potatoes, you must cure and store them in such a way that they will be in good condition when placed on the market.

"The first thing is to thoroughly clean the storage room and all crates or hampers to avoid infection," said L. P. Watson, extension horticulturist at State College.

Then heat the storage house to a temperature of 85 degrees Fahrenheit before putting in the potatoes. Maintain that temperature throughout the curing period. The air should

here again North Carolina has an advantage in being able to secure fish meal, cottonseed meal, peanut meal, and soybean oil meal produced in the State.

not be excessively dry or damp. Wounds or bruises are the starting places of infection, and they should be healed as soon as possible. The healing process will begin in about three days if an 85 degree temperature is maintained.

When the potatoes are mature and an even temperature is kept up, the curing period lasts from 10 days to three weeks. The average curing time is around 15 days.

When potatoes in the upper tier of crates begin to sprout, curing is complete. Some growers determine when it is complete by grasping the potatoes firmly in their hands. If the tubers feel velvety, they are ready to be left in storage.

Plenty of ventilation is essential, Watson added. During the first week, potatoes give off much moisture, and the excess should be driven out of the house.

If moisture gathers on the walls and window panes, open doors and windows so the excess can escape, even if this does cause the temperature to fall a little below 85 degrees.

But at night and on rainy days, doors and windows should be kept closed. However, there should be some ventilation through the floor and ceiling at all times.

After the curing process is over, gradually reduce the temperature to 50 or 55 degrees and keep it there during the rest of the storage period. Keep roof ventilators partly open except in cold or cloudy weather.

LEGAL NOTICES

ADMINISTRATOR'S NOTICE

Having qualified as administrator of the estate of Mrs. Dolly Rimmer, deceased, late of Person County, North Carolina, this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 29th day of September, 1937, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment.

This 29th day of September, 1936
ISAAC J. RIMMER
Admr. of Mrs. Dolly Rimmer
Wm. D. Merritt, Atty. 10-1-6t.

Advertise In The Person County Times

A number of small farmers in Swain County will use a ton or more of lime each this fall as a demonstration. So far twelve men have purchased 50 tons.

Sold by HARRIS & BURNS

"LET'S GET HANES AND STAY HOME THIS WINTER!"

Don't be caught out on a limb when the snow starts to fly! Put on your "Winter-Front" today... get Hanes Heavyweight Champion. The minute its velvety, warming nap curls against your skin, you'll feel your goose-pimples start to melt... and you won't freeze up all season!

When you've climbed into Hanes, notice its trim fit. That's because it's knit and cut to the measure of your chest and trunk. And Hanes elastic-knits the fabric with plenty of give and take. You can bend at the waist, raise your arms—Hanes won't hold you back. See your Hanes Dealer today.

Hanes Union-Suits, as illustrated above, \$1 up... Shirts and Drawers begin at 75c... Boys' Union-Suits, 75c... Merichild Waist-Suits, 75c... also WINTER SETS (the new shirts and knit shorts illustrated at left), 50c and 75c per garment. P. H. Hanes Knitting Co., Winston-Salem, N. C.

THE ANTI-FREEZE UNDERWEAR FOR MEN AND BOYS

Sold By Leggett's Department Store Roxboro, N. C.

Thru 50 Years

1886 to 1936

Fashions come and fashions go, but the pause that refreshes with ice-cold Coca-Cola has been increasing in popularity for 50 years. Of course, it had to be good to get where it is.
