

**RAIL COURT PROPOSED**

Washington, D. C.—A bill introduced by Senator Wheeler of Montana and Truman of Missouri provides for a Railroad Reorganization Court to supervise the rehabilitation of insolvent railroads. It is designed to "prevent recurring cycles of insolvency, reorganization, further insolvency and further reorganization" which have disturbed the railroad financial picture for the past decade.

**A SHORT SERMON**

By **ELDER DONALD W. DAVIS**

**PRE-EXISTENCE OF MAN**

It is our duty to study the many conflicting theories as to where man came from, and why he is upon the earth, and see if they coincide with the Bible, because; Sincerity of belief does in nowise establish the correctness of a principle, it does not matter how long a person has believed a certain thing if it is not true it never will be. Man's belief does not effect a principle in the least, the whole world may believe it and yet it may be untrue or the whole world may disbelieve it and yet it be true.

The unbelief in Noah's day did not stay the flood. Noah warned the people if they did not repent they would be destroyed and they were. The Jews were sincere when they crucified Christ, yet it did not prove him an impostor, or the killing of the prophets did not prove their doctrine false.

Truth, no matter where it is found, will triumph over error the words of a poet express that thought very beautifully—"Truth is the work of God, falsehoods are the work of men. Truth crushed to the earth will rise again, the eternal years of God are hers. But error, wounded, writhes in pain, and dies among its worshippers."—Bryant.

We believe that we existed as spiritual children in the presence of the Heavenly Father before we were born upon this earth. This is brought out in many instances by the earthly prophets and the Lord's dealings with them. The Lord speaking to Job said: "Who is this that darkeneth Council without knowledge? And he asked Job where he was when he laid the foundations of the world, when the morning Stars sang together and the sons of God shouted for joy. Now Job must have been somewhere or why the question? Who were these sons of God who shouted for joy? Luke gives us the answer in giving the genealogy of the Human race, "Which was the son of Enos, which was the son of Seth, which was the son of Adam, which was the son of God."

One of our ancient prophets in Ed. 12: 7 says "Then shall the dust return to the earth as it was and the Spirit return unto God who gave it." Now how can we return unto a place where we haven't been. We can go to a place but we can't return unto a place unless we have once been there. When death takes us our earthly body decomposes and returns to the dust of which the earth is made of, and the spirit returns unto God who gave it, under His jurisdiction.

Again we find that the Apostles must have had a knowledge of pre-existence. When they passed by the blind man they asked Jesus (John 9: 13) "Who did sin this man or his parents that he was born blind?" plainly showing that he could have sinned before he was born.

Paul in his writings to the Hebrew Saints says, "Furthermore we have had fathers of our flesh which corrected us and we give them reverence, shall we not much rather be in subjection unto the Father of our spirits and live." (Heb. 12: 9) Here we learn why we address Him as our Father who art in Heaven to distinguish Him from our earthly fathers.

Pre-existence is plainly taught by the Saviors, who spoke thus, "What, and if you shall see the son of man ascend up where he was before," and again "no man shall ascend up to Heaven but he that came down from Heaven." (St. John 3: 13.)

Before birth, now, and after death each of us has been, is, and shall be, a distinct personage—the same being throughout, of unchanging identity and therefore everlasting. You were you and I was I before we were born into these bodies of flesh. You shall be yourself and I shall be myself beyond the grave.

**FAMOUS WOMEN TALK ABOUT SILVER**

(From April Good Housekeeping Magazine)

Mrs. Borge Rohde (the former Ruth Bryan Owen, Envoy Extraordinary and Minister Plenipotentiary to Denmark) has had thirty years of enjoyment from the flatwear you see pictured here. Bought before her marriage, this simple pattern has never failed to give Mrs. Rohde that little glow of pride that we all associate with our fine possessions. "One does not tire of simple things," says Mrs. Rohde, in speaking of her pleasure in her silver.

Her silver flatwear has seen lots

MRS. BORGE ROHDE

Dorothy Kilgallen, star reporter who is famous for racing by air round the world against two masculine competitors and for her syndicated column "The Voice of Broadway," has an interesting point of view about her silver.

"I see so much of the tinsel and make-believe of Broadway that I probably appreciate more than most people the beauty of sterling silver."

Miss Kilgallen is acquiring her silver by the place-setting method, periodically buying all the pieces.

DOROTHY KILGALLEN

of important duty—in such varied places as Jamaica in the West Indies, London, Cairo, and Washington, through to diplomatic duty in the American Legation in Copenhagen, where Ruth Bryan Owen Rohde did her official entertaining.

She has a service for eighteen, although in some pieces that are necessary for state dinners she has as many as five or six dozen of a kind. Mrs. Rohde does not remember the name of her pattern, and considers it irrelevant to its beauty.

for setting one cover. Different kinds of pieces can be grouped to make a place setting, but Miss Kilgallen has chosen to include a dinner knife, dinner fork, salad fork, butter spreader, oval soup spoon, and teaspoon in her place settings.

When asked why she chose the pattern called "Greenbriar," she said: "I was choosing the silver for a future household and not an existing one. So I chose a pattern that would look well in almost any type of decorative scheme."

thick. Also, if lespedeza is seeded out on top of a hard seed-bed without harrowing, the seed will sprout and start off with very shallow roots. The plants thus handicapped cannot make a good hay crop and they are very easily killed by drought.

However, if the wheat, barley or other small grain has grown to any considerable height, the harrow might injure the grain—especially if the stalk has begun to joint.

Those farmers who wish to have lespedeza count as a soil-building practice this year should keep in mind that one acre of lespedeza counts only one-half unit. Heretofore each acre of lespedeza seed has counted one unit. However, for 1939, each acre of lespedeza seeded will count only one-half unit of soil-building practice, according to the rules and regulations.

**PASTURE:**  
Each 10 lbs. of good seed of adapted pasture grasses or legumes applied in re-seeding depleted pastures will count as one unit of soil-building practice. In no case will credit be given in excess on one unit for each acre on which the practice is carried

out. There are many pastures in the county which could be improved by re-seeding this spring. Cut the sod with a disk harrow set almost straight, so as not to destroy the old sod. Then apply fertilizer and sow seed. An application of 200 to 400 pounds an acre of fertilizer suitable for corn may be applied; or a liberal application of manure. One ton of ground limestone should be applied on each acre unless this quantity has already been applied during the last few years. For the best pasture, apply a mixture of superphosphate, or acid phosphate, and ground limestone. Even if it is too expensive to treat a whole pasture at one time one acre, or even a part of an acre may be treated and re-seeded each year.

ADVERTISE IN THE TIMES FOR RESULTS.

**LESPEDeza:**

All lespedeza that has not been seeded should be put on the field just as soon as possible. The weather this spring has been so unfavorable for field work that a number of farmers have not finished sowing lespedeza. If this is to be seeded on small grain crops or any other seed that has not been recently prepared, the land should be harrowed with a section harrow either before or after seeding the lespedeza.

If lespedeza is seeded on top of small grain land without harrowing, washing rains may come and float the unharrowed seed into puddles. This will give a very uneven stand, with many bare spaces in between bunches of lespedeza that are far too
