The Germans have landed in Canada, as this photo shows. But they came as prisoners of war and not as conquerors. The above detachment are shown marching through train sheds in Quebec, on their way to Canadian prison camps. Canada was regarded as an extremely safe place for these prisoners because they are all specialists, including air pilots, parachutists and navy men. Originally imprisoned in England, they were moved to prevent danger during Hitler's attack on England.

## Nickle-A-Bale War Chest For Cotton On Way

Cotton firms and cotton farmers of Roxboro and surrounding area were called on today by President Oscar Johnston of the National Cotton Council for "100 percent allegiance in cotton's war for increased consumption."

In a message addressed to local producers throughout the county President Johnston declared that "the raw cotton industry is arming as never before in its history to smash to smash down the blitzkrieg of substitutes, surplus, and foreign competition."

The message came simultaneously with the National Cotton Council's announcement of a "universal service" plan to provide funds with which to carry on the fight during the coming year. The new plan, to go into effect August 1, calls for a defense fund of five cents on every bale of lint and three cents on every ton of seed, mobilized with the help of each of the primary raw cotton interests.

Under the new plan, arrangements have been perfected for the producer to make his nickle-a-bale contribution at the first point of sale, either to the cotton merchant, large or small, or the ginner or warehouseman acting as merchant. This contribution is carried on from merchant to compressor, who remits the accumulated funds to the Council when the bale is first compressed, or from merchant to textile mill which remits on uncompressed cotton.

Similarly, contributions on seed, which are made by the ginner and crusher, are assembled and remitted to the war chest by the oil mills. "For fifty years we cotton farmers have been talking about an organization like the National Cotton Council to defend our markets and find new ones thru judicious advertising, intelligent research, and organized opposition to restrictive legislation. At last we have it, and in two years equipped with modern weapons, it has accomplished more than any of us thought was possible in so short a period."

"Domestic consumption has been brought back virtually to the all-time high, with every indication that a new record can be set in 1941. Plans are ready for a vigorous attack on the acute problem of foreign trade, Council scientists are on the trail of new uses. A united cotton industry has gone to war."

Once before—in 1871—a conquering German army occupied Paris, following the Franco-Prussian war.

Washington — With export markets for farm products clouded by the European war, a national conference of State AAA committeemen swung today to the view that present Federal restrictions on the production of major crops should be continued next year.
