

# SPORT SLANTS

## Two Good Golfers

John Morris and Bill Harris III are slated to meet in a golf match at the Country Club soon. It should be a good match and it is impossible to tell who will win.

Last year these two boys were in the finals of the gold tournament and Billy finally won out. They shot mighty good golf and can be counted on again to do O. K.

When they meet you can see some good golf if you want to follow them around.

A crowd will not bother them, so don't hesitate to go out and look on.

## Coach W. W. Wade

William Wallace Wade, headmaster of the Duke University football school, stood Saturday at the zenith of a great coaching career—a career that is certain to give him a place alongside immortals of the great gridiron game.

When the Duke Blue Devils took the field for their Southern Conference battle with Maryland's Terrapins at Baltimore's huge municipal stadium Saturday, the Old Master had good cause to reflect on that career. For Maryland was the 100th opponent to face his Big Blue teams since first he directed Duke's athletic destinies in 1931.

The Wade decade has been a glorious one at Duke. The hard, cold facts sing of that glory. They tell a story of 78 well-earned victories—only 18 defeats and three ties. They back up the tactical genius that is Wallace Wade.

Five times during that decade, the Southern Conference championship has been bestowed upon the Blue Devils. And never once has there been a losing season. Wade's first team—in 1931—won five games, lost three and tied two. But after that, Duke teams triumphed at least seven times in each campaign.

Wade has produced some great teams since he first accepted the responsibilities of head coach at Fitzgerald-Clarke in 1919. He had an undefeated outfit at that school one year later—and never lost a game at Vanderbilt during his two years there.

At Alabama, where he put over four Southern Conference and three national champions, his Rose Bowl teams of 1925, 1926 and 1930 were his best.

Wade is now and has been a great coach. He knows football and more than that he can teach it. His players respect him and try to do what he wants them to do.

We think that North Carolina and the South is fortunate in being able to have a great coach like Wade in its midst.

Cox, Quarterback Carolina

Sophomore sensation of the 1941 edition of the University of North Carolina Tar Heels has been Hugh (Shot) Cox, flashy quarterback, who hails from Camden South Carolina where he was all-State signal callers in 1939. Cox is pushing Frank O'Hare hard for the first string berth and will probably see action Saturday against Fordham.

## DUKE TO REPEAT DEFENSE COURSE

Course On Chemistry Of Explosives Again To Be Given; Opens Oct. 20

Durham, Oct. 6.—So successful were the courses in chemistry of explosives, conducted last Summer, Duke University will repeat the nine-weeks course, beginning on October 20.

Nearly all of 67 who took the national defense training course last Summer have secured jobs. Most of them are in the explosives industry as production supervisors, chemists, and government inspectors. There still is a need of trained personnel in the field.

The course will consist of 38 hours of lecture and recitations and 112 hours of laboratory work. Part of the course deals with the chemistry of explosive compounds and mixtures, and with various methods of testing explosives by chemical and physical means. Laboratory work includes the making and processing of TNT and other explosives, and testing them by methods used in arsenals and powder factories.

Dr. Marcus Hobbs, of the Duke Chemistry Department, who took special training in order to conduct the course, again will be in charge.

To be eligible for the course one must have had at least one year of college chemistry. Upon completion of the course the student will be eligible for Civil Service employment in the explosives industry. Expenses of the course, other than maintenance, are borne by a government appropriation.

At the very beginning students are taught how to handle explosives safely and to use various protective devices. None of the students taking the Duke course last Summer had a mishap. Only small amounts of explosive materials are handled at one time.

## Ramblers Bow To Henderson In Grid Game

Roxboro High School Ramblers met Henderson High School Friday afternoon at Henderson and suffered their fourth successive gridiron defeat of the present season, with a score of 26 to 0 in favor of Henderson.

Numbers of loyal Roxboro supporters went with the team and boosted them with good cheering, but the Henderson lads, reported to be much heavier than the locals, won out. Henderson has, however, been defeated a number of time in other years by Roxboro.

## Farm Notes

North Carolina farmers have been given a very definite share in the "Food for Freedom" campaign. The State has been asked to increase, in 1942, its milk production by 58,000,000 lbs. and its beef by 10,164,000 lbs. We must have good pastures to do this job. Begin now to prepare your pasture for next year.

The ideal seed bed for pastures is one that is thoroughly pulverized to a depth of three inches, and undisturbed below that depth. If plowing is necessary, that should be done at least six to eight weeks before sowing the seed. Lands that have been in row crops can be prepared by discing and harrowing, but land that has been lying idle may have to be plowed shallow before discing. Freshly cleared land may be ready by burning the brush and harrowing with a disc or an old-fashioned A-shaped harrow. To renew an old pasture, cut down weeds and shrubbery, and scratch the soil to a depth of 2 to 3 inches. This may be done with a heavy spike-tooth harrow, or with a disc set almost straight, so as not to destroy the old sod.

Put as much manure on the land as possible. An application of 200 to 400 lbs. per acre of 2-10-4 fertilizer, or of 4-12-4 is desirable. In addition to this, practically all the pasture land in Person County needs 2,000 lbs. of lime per acre and also a liberal application of 13% acid phosphate or superphosphate. All old pastures should be top-dressed about March 1.

For the average pasture land in Person County, the following mixture is recommended:

- Kentucky blue grass, 4 lbs.
  - Redtop (Hardgrass), 5 lbs.
  - Orchard grass, 8 lbs.
  - Dallis grass, 4 lbs.
  - White clover, 5 lbs.
  - Lepedeza, 10 lbs.
- Do not include Kentucky blue grass in the mixture unless lime has been used.

### TIMELY FARM REMINDERS

1. Complete earning soil-building units before October 31st. Every farmer who is not sure that he has completed all the units necessary should check the record of his farm in the county AAA office, on the second floor of the Court House, and find out exactly how many units are necessary. Notices have been mailed to every farm operator stating how many units are necessary, but in some cases these notices have been misplaced. The office force will be glad to give this information to any operator who asks about his farm. Remember, the 1941 adjustment payments are made on a percentage basis, in proportion to the soil-building units earned.
2. Distribute all limestone before October 31.
3. Make deposit with the Treasurer of the Conservation Association, on the second floor of the Court House, if you wish to have your wheat acreage measured before it is planted. A deposit of 15 cents per acre of wheat to be planted is required before a supervisor can do premeasurement work.
4. Just as soon as it rains, prepare for seeding barley, oats and wheat. The farmers of North Carolina are requested to sow twice as much barley as was seeded in the fall of 1940. This crop grows well in Person County. Make your plans now to get some in before November 1, if possible. Oats may be seeded until October 25 in this section.
5. Most of the tobacco stalks in the county have been cut. Those that are standing are breeding places for horn-worms, flea-beetles and various other enemies of next year's crop. Cut them down and turn them under just as soon as possible.
6. Fill in any broken terrace lines.
7. Seed ryegrass in any terrace outlets that are washing out.
8. Set out cabbage plants as soon as there is a season.
9. Dig sweet potatoes before frost.
10. Clean and disinfect poultry houses and yards. Where possible, prepare to keep birds in laying houses all winter. Each grown bird requires a minimum of 3 1-2 sq. ft. of floor space.

DE LA GUARDIA WILL COOPERATE WITH U. S.

Panama, Oct. 11.—A coup d'etat government pledged to collaboration in continental defense is reconsidering an order Monday by ousted President Arnulfo Arias which barred the arming of merchant ships flying Panama's flag.

A cabinet member said that some decision on the question—which affects many United States-owned vessels shifted to Panama registry because of the neutrality act to carry war supplies to Britain—might be announced later.

## HUGE BALLOON GETS LOOSE AT CAMP DAVIS

Camp Davis, Oct. 11.—A barrage balloon snapped its cable here yesterday and was last seen heading southeast. The cable

snapped 600 feet below the balloon under ordinary maneuver conditions, said officers of the barrage balloon training center. Pope Field at Fort Bragg was notified and it in turn notified civilian and military airports in the area.

1891 Fifty Years of Service 1941

RESPONSIVE  
to America's needs

- The American banking system has responded to the nation's emergency needs in a magnificent manner. It has loaned money for defense production on one hand, and raised funds to help pay the bill on the other.
- It is helping people prepare for the huge new taxes looming ahead. Each bank has found ways to serve in keeping with the needs of its own community.
- If you have a problem that relates to money, perhaps we can help. Come in and talk with us. We are constantly on the alert for new opportunities to serve.
