House for sale: Close in, 6 rooms, two baths, large shady lot.

WANTED:— SEWING MACHINE IN GOOD CONDITION—call 4101.

Sunshine Increases Vitamins Studies indicate that sunshine increases vitamin C. Citrus fruit growing on the sunny side of the tree has been found richer in C than the fruit growing in the center of the tree or on the shady sides.

Smoke Appliances The army's mechanical smoke generators come in two sizes. The largest, truck or trailer mounted, can blanket a square mile within 10 minutes.

Waxing Furniture When waxing furniture, take care not to let the wax dry completely before polishing. Here treatment differs from that of floors—where the wax should be allowed to dry thoroughly (about 30 minutes) before polishing.

Woodland Fires Cut Deeply Into Forest Value

Woodland fires affect the sales value of trees, seriously reduce their rate of growth and leave the woods less able to control soil erosion and conserve moisture.

An accidental fire occurred in one of the university's woodland improvement demonstration plots. Before the fire, the average annual rate of growth amounted to 405 board feet per acre.

Work Out Fat-Saving Salad for Spring Greens

A recipe for making a fat-saving salad dressing that is good on spring greens has been worked out. The recipe calls for the usual ingredients of eggs, vinegar, milk, fat, sugar, salt, mustard, celery seed and paprika in these amounts:

Beat the eggs and vinegar until you have a smooth mixture. Then add the milk and table fat. Then add the seasoning. Cook the salad dressing over hot water.

Tomato Slowly Accepted

It took a long time for English-speaking people to accept the tomato as a food plant. It had been used to a considerable extent by the Incas of Peru and perhaps to a lesser extent by the Mayas in Mexico, but apparently even with these people it had never achieved the popularity of potatoes, beans, corn and squash.

Water Use

The plants of one industrial company in the Youngstown, Ohio, district used 95,303,710,000 gallons of water in 1945, an amount which would provide the yearly home supply for a city with over 3,000,000 people.

Cabbage Rolls

Outside leaves may be used in making cabbage rolls, an economical meat dish. To make cabbage rolls, wash the leaves and wilt them in hot, lightly salted water until they are limp enough to roll.

Weed Killer

With proper use, 2,4-D, the new chemical weed killer, controls common annual and biennial as well as common lawn weeds without injury to grass.

Frying Pan." Featured roles in "Claudia" will be played by Kathryn Allen of Scarsdale, N. Y., Suzanne Natchmann of St. Louis and Adger Brown of Columbia.

"Unpredictable as a June morning and twice as rare," one of the New York critics said about "Claudia" which tells the story of Claudia's meeting of life and her acquiescence to the demands that living makes upon her.

Discover Dark Star in Southern Constellation

The discovery of a new "dark star" by Dr. Nicholas E. Wagman, acting director of the Allegheny observatory, University of Pittsburgh, is one of few such discoveries in history of astronomy.

The existence of another one became known while Dr. Wagman was photographing certain bright stars through an absorbent glass.

In the course of this work he noticed the bright star of the constellation moving in an orbit, indicating the presence of a dark star. He also noted the erratic path of Alpha Ophiuchi, a wavy-line course unlike straight courses of other stars.

Disguise Symptoms

Dosing members of the family for every complaint of illness is a dangerous practice; drugs disguise symptoms and thus delay diagnosis and treatment.

Cellar Steps

A helpful home hint is to paint the edges of the cellar stair treads with a band of white paint which will make them easier to see.

Broccoli Nutritious

A half cup of broccoli contains 8,000 units of international vitamin A—a generous day's allowance for anybody. And it furnishes, even more when seasoned with butter or vitamin fortified margarine.

Shortages are holding him back

We in Southern Bell have been adding telephones at the rate of 350,000 a year. But shortages have been growing worse, and now it's harder and harder for us to get materials for manufacturing and building.

We aren't complaining for we are in the same boat as everyone else. But we thought you might like to know the supply situation on some of the biggest items in the telephone business.

LEAD—There is a world shortage of lead. Even when conditions here straighten out, it will be some time before adequate supplies are available.

COPPER—In great demand but we will probably have adequate supplies when the smelting, refining and fabricating plants get going.

TEXTILES—Serious shortage of cotton and synthetic yarns and fabrics, with demand greatly exceeding supply.

STEEL—Steel and coal strikes have

affected supply in face of unprecedented demand.

RUBBER—Synthetics are in fair supply but natural rubber is on Government allocation.

LUMBER—Scarce supply due to unprecedented demand and dislocation of lumber trade.

BRASS MILL PRODUCTS—Used in Central Office switches and other telephone equipment. Supply will be short until disturbed conditions are settled in the copper industry, permitting brass mills to get back to full-scale production.

It's a tough situation, but we aren't giving up, any more than you have given up trying to get butter or shirts.

We're doing the best we can with what we've got and hoping these disturbed conditions will end, so we can really go full speed ahead.
