

Consumers Urged To Buy Fuel For Winter At Once

Taking notice of a nation-wide program of summer fuel buying launched yesterday by the secretary of the interior with an appeal to government agencies, industrial and residential consumers, defense transport administrator James K. Knudson, today issued a statement underscoring the transportation aspects of that program.

Administrator Knudson noted that widespread suffering was prevented last winter by near miracles in transportation and warned that the mounting burden of defense and defense supporting traffic will, by this fall and winter, make such heavy demands upon the nation's transport capacity as to create the unlikely prospect that relief can promptly be provided for spot areas in distress. The normal peak movement occurring in October and November must this year, he said, be spread over a longer period including the summer months. The administrator continued:

"Defense plants are already stepping up production and their requirements for coal and other fuels will grow steadily greater. Transportation must be provided this year for ten per cent more coal than was produced in 1950 and freight cars suitable for hauling coal are in short supply and will become more so. The situation is, if anything, more acute with respect to tank cars suited to the transportation of fuel oil and liquefied petroleum gases. Cars of those types are experiencing an increasingly heavy demand in high priority defense activities. "The wise consumer will stock-up now, and I join with the secre-

68 Years Old, Yet Now Climbs 155 Feet to Work on Scaffold

HADACOL Relieves the Cause of Nervousness and Weakness When Due to a Lack of Vitamins B₁, B₂, Niacin and Iron.

Seems like more and more folks are finding out every day that they have to keep themselves in tip-top condition to really stay on the ball as far as doing a good job is concerned. Mr. John L. Napier, Route 1, Moselle, Mississippi, certainly found out that aches and pains, weakness and nervousness were interfering with his work as a bricklayer and carpenter.

But Mr. Napier heard how HADACOL was helping folks with such conditions that may have been due to deficiencies of Vitamins B₁, B₂, Iron and Niacin.

Here are his own words: "Before taking HADACOL, I was suffering with aches and pains for awhile. Then, came the time when I was weak and nervous. I am a carpenter and bricklayer. I also run a farm. I kept feeling bad and getting worse. Then I heard about HADACOL and immediately began taking it. After taking only one bottle, when I retired at 9 P.M. I would fall asleep immediately.

After the third bottle I went back to work, carpentering and laying bricks. Now, I climb as high as 155 feet and work all day on a scaffold. I have never felt so well in many years. I am 68 years of age. And, when there is no carpenter or brick work to do, I work on my farm, planting and harvesting my crops. Thanks to HADACOL."

There's a clue that may help you, if you are suffering from a lack of Vitamins B₁, B₂, Niacin and Iron. Why continue to suffer... why experiment... why let your distress drag you farther and farther down? For it is these very Vitamins and Minerals you may need that HADACOL supplies in a quantity greater than the minimum daily requirements. And this marvelous formula contains helpful quantities of Phosphorus and Calcium, too.

HADACOL builds up the hemoglobin content of the blood (when Iron is needed) to send these elements coursing, surging, throughout your body, to every body organ. Already dissolved, in a special liquid form, the elements are absorbed quickly and easily in your system. Carries a strict money-back guarantee.
