the results to date, VA said, are the prospects for the future. The segment of the population covered is so large, VA said, that the results not only will reduce the incidence of TB infection among veterans and their families, but also should reduce the number of TB cases and deaths among the general population. Officially known as the tuberculosis case finding survey program, the vast scope and importance of the endeavor are indicated in the four-year analysis just com-

The figures show that an average of 67,000 persons was screened each month during the fourevening year period. Among this group,

known cases of active pulmonary TB and 760 inactive cases have been turned up each month. This son, A. C. Leonard, and the host is an average of approximately 1,000 new cases found every month for the four-year period.

In view of the infectious nature of active pulmonary TB, VA said it considers the number of new cases found and treated each month as an achievement in the nation-wide campaign to bring TB under further control. In fact, VA added, the mass survey has

made it possible, for the first time, to keep VA installations virtually "clean" from TB infection
