BY MRS. ELIZABETH G. PARHAM Home Service Representative of Carolina Power & Light Company

Most everyone likes the flavor of ham. It's especially good when served with a fruit accompaniment. Using that happy principle here is a distinctive dish known as ncheon, supper or dinner main is something to make a good cook wonderful recipe.

#### Ham Banana Rolls with Cheese Sauce.

4 thin slices boiled ham Prepared mustard

4 firm bananas 11/2 tsp. butter or margarine, melted

Cheese sauce. Spread each slice of boiled ham lightly with mustard. Peel bananas. Wrap a slice of the prepared ham around each banana. Brush tips of bananas with butter or margarine. Place Ham Banana Rolls into a greased shallow baking dish and pour cheese sauce over them. Bake in a moderate oven (350 degrees F.) for 30 min-

#### Makes 4 servings.) Cheese Sauce 11/2 tbsp. butter or margarine

Serve hot with Cheese Sauce, di-

ectly from the baking dish.

11/2 thsp. flour

34 cups milk 11/2 cups grated sharp American

Melt butter or margarine in saucepan; add flour and stir until smooth. Stir in milk slowly, Add cheese and cook, stirring constantly until sauce is smooth and thickned. (Makes about 1 cup sauce.)

# NORTH CAROLINA'S \*4-A MANPOWER **EXCELS AS** PRODUCTIVE LABOR

The all-important question in the minds of every industry, about the supply and character of manpower, is satisfyingly answered by these \*4-A qualities of North Carolina's labor resources-both men and women:

\*1-ABUNDANT-Tenth in the nation in population, with substantial annual increases. Of the present total labor force-more than 1,500,000, with 987,000 in non-agricultural employment—a growing supply is being freed for industry through the rapid mechanization of farming.

\*3-AGREEABLE-Willing to cooperate in any equitable experiment for obtaining increased productivity; open-minded about new methods and more efficient machines; appreciative of fair treatment, with an excellent record of management relations.

intelligent and well-schooled, with natural resourcefulness and a high level of ability; vigorous people who are accustomed to working wholeheartedly, to sharing responsibilities and taking pride in achievements.

\*2-ABLE (and dependable!)-Native-born,

\*4-ADAPTABLE-Possessing an unusually high degree of "frainability", quickly supplementing original abilities with new skills for specific jobs, eager to learn through training courses provided by the community, State or industry.

WESTERN ELECTRIC'S EXPERIENCE-

"We knew when we came to North Carolina there would be much training involved and we were concerned about how rapidly the people here would adjust to our work. We were agreeably surprised however to find the training requirement to be less than half what we expected, showing how adaptable the people are."

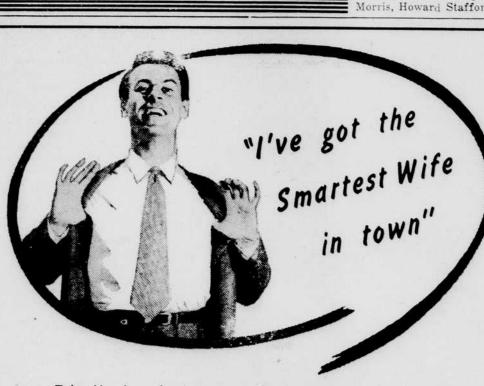

And productive labor is supported by many other assets-an abundance of power, water, raw materials ... all forms of transportation . . . stabilized tax structure . . . nearness to motion markets ... year 'round mild climate

timulating recreational and cultural opportunities. Additional data and current Friendly plant site availabilities will be promptly supplied by-
