 Mrs. Carson's room enjoyed the trip from the old school building to high school very much. They also have two new pupils in their room. They are Jimmy Plemmons from Walnut, N. C., and Barbara Reed from Swannanoa. Their class

Mrs. Sorrell's seventh grade class have been learning how to plan meals according to the Basic Seven. They made tests of foods that contain proteins by mixing foods with nitric acid. Those which contain proteins turned orange in color. For the tests of starchy foods they added iodine solution to crackers, potatoes, and bread. These foods turned very dark, which proved they contain starch. They also chewed a cracker and found that it changed its taste, which was sweet, proving that starches turn to sugar before leaving the mouth.  
 The vitamin study is very interesting. They have learned what diseases develop when you do not eat enough vitamins and minerals.
