Mr. and Mrs. P. M. Osborne and two children have moved here from Belmont, N. C., and are residing in the John Brittain home on Hiawassee way. Mr. Osborne is employed with Clearwater Manufacturing company, Old Fort.

BEE TREE NEWS

By Mrs. C. M. Howie

If the old tradition holds true for Feb. 2, Ground Hog Day, then we shall soon be having pretty weather. Tradition says that if he came out and saw his shadow, he would go back and stay six more weeks, and if not it would be pretty. I don't believe he saw his shadow. It was so cloudy and foggy that day.

Bud Pruett of Bee Tree road had a car accident Saturday night and is in Moore VA hospital.

Bill Williams, stepfather of Mrs. Monroe Howie, was taken to Moore VA hospital Friday to undergo treatment.

Mrs. W. C. Burnette of Longs Branch road has not been very well this past week. She has had a slight cold. She is nearing her 91st birthday which will be March 9.

We wish to send Aunt Roxana Walker of North Fork our best wishes. She has just passed her 96th birthday this January. She and my mother, Mrs. Burnette, were old school mates. Mrs. Walker is the daughter of John M. Pitman. She was born and grew up on Bee Tree and lived here until she married. Julius Walker and moved to North Fork many years ago.

Mr. and Mrs. H. G. Morgan and Mr. and Mrs. Herman Morgan of Longs Branch road visited the Carol Lavenders in McDowell county Sunday afternoon. The H. G. Morgans went to see their grandson, a son of Carol.

This clipping will entitle Douglas Jones and one guest to free admission to see "Love Is A Many Splendored Thing" at the Pix Theater.

—Because of the plentiful supply of fish, crustaceans and plankton in the waters surrounding Antarctica, these waters abound in whales and seals.

Beverly Hills News

Mrs. Fred Watson
Box 9194, Asheville, N. C.

Mrs. A. E. Gardner has been ill at her home on Governors View road for the past several days.

Mrs. Julia Kent, mother of Mrs. Fred Watson, is improving very much. She has been ill with virus pneumonia at the home of Mr. and Mrs. Garris, Old Leicester highway.

Mrs. John Shackelford of Lower Craig circle is very ill at her home.

Mrs. Myrtle Cantley Keating is ill at her home on Lower Craig circle and is confined to her bed. She is suffering with a deep chest cold.

Mrs. Louis Jindra and son Tommy of Oak Hill, Ohio, are spending several days with the Fred Watson family on Lower Craig circle. Mrs. Jindra is Mrs. Watson's daughter. She was called home due to the serious illness of Mr. Watson's mother, Mrs. Jindra and Tommy experienced their first plane ride. They boarded a plane in Charleston, West Va. They plan to return home on Sunday night by plane.

Mrs. Fred Watson, Mrs. Josephine Jindra, and Tommy Jindra visited Mrs. M. A. Burgin and the Lewis Watson family on Thursday and again on Saturday. Mrs. Burgin is recovering from her recent illness.

Mrs. Cahoon of Oakley is spending the week-end with Mr. and Mrs. John W. Shackelford at their home on Lower Craig circle.

H. R. Kent and Mr. and Mrs. R. C. Capps of Black Mountain, Mrs. Martha Aiken and Mrs. Lewis Stafford of Swannanoa, Mrs. Fred Watson and Terry Watson of Lower Craig circle attended the funeral of their aunt, Laura Kent, on

last Monday afternoon at Weaverville.

Mrs. Snowe Riddle of Haw Creek road is ill at her home.

Mrs. Louis Jindra and Tommy Jindra of Oak Hill, Ohio, visited the J. W. Shackelfords of Lower Craig circle on Thursday night.

Sorry I can't report on my favorite basketball team and games but with visiting the sick, attending the funeral, and crying over the passing away of our family pet cat I haven't been able to see a ball game this week.

Our cat whose name was "Pretty Face" died in an animal hospital. He was around 10 or 12 years old and was quite a family favorite.

Mr. and Mrs. George Watson and daughter, Janice Watson of Ridgecrest, visited the Fred Watson family on Sunday afternoon.

Activities at the Beverly Hills Baptist church this week consists of the funeral, and singing over the funeral, and singing Monday night, Wednesday night church practice at 8:15, and Ruth class meeting Thursday night at 7:30. The pastor, Rev. Matthew, brought a wonderful message on Sunday morning. His subject was "Church Offices."

CHESTNUT-SIDED WARBLER

© 1954 National Wildlife Federation

Shrubbery near pastures or at the margins of woodlands provides food, shelter and a proper setting for this delightful warbler. Late spring and early summer are the times when most of us are likely to see and hear this bird. Probably there are more persons who will recognize this bird by sight than there are those who will recognize its call, but this is because most amateur naturalists have been trained to use their eyes rather than their ears and because it is easier to print a bird's picture than it is to accurately transcribe its voice.

The Chestnut-sided Warbler measures about 5 1/4 inches in length. This is about the average for warblers that swarm through our tree tops in early summer. The female is slightly smaller than the male. The name justly implies that the most distinctive field character is the chestnut coloration on the sides. In spring, the adults show conspicuous yellow crowns that contrast sharply with the dark-crowned Bay-breasted Warbler with which this species

Thursday, Feb. 9—
Chicken pie, rice gravy, carrots, peas, jello.
Friday, Feb. 10—
Fish, tartar sauce, baked potato, tomatoes, butterscotch pudding.
Monday, Feb. 13—
Macaroni and cheese, spiced meat, relish, stewed cabbage, blackberry cobbler.
Tuesday, Feb. 14—
Browned beef, mashed potatoes.

Roast pork, baked sweet potatoes, apple sauce, cookies, peanut butter.
Milk, bread, and butter are served with all meals.

This clipping will entitle Dempsey Whitaker and one guest to free admission to see "Day The World Ended" and "The Phantom of 10,000 Leagues" at the Pix Theater.

might possibly be confused. In the fall, the birds appear to be greenish above and whitish below and have a rather distinctive white eye-ring and two white wing bars.

During the breeding season Chestnut-sided Warblers range from central Saskatchewan to Newfoundland and south to eastern Nebraska, northern New Jersey and the mountains of Tennessee and South Carolina. The winter range includes the area from Guatemala to Panama. Occasionally the birds are found in California, Greenland, Florida and the Bahamas but these are exceptional cases.

The nests of Chestnut-sided Warblers are usually well hidden in the trees and shrubs, and not over a few feet above the ground. They are neat, compact structures made of grass, weeds and bark, well cemented together with cobwebs and lined with fine plant fibers. In the nest, the hen bird lays four or five white or creamy eggs that bear brown or lavender spots. The eggs are about two-thirds of an inch long.

Incubation lasts for ten to eleven days and the young are cared for by both parents. There is but one brood a year.

As might be expected, if one were to judge from where the birds are found, the food consists largely of insects that feed upon the foliage of trees and shrubs. These warblers are known to eat large quantities of gypsy moths, tent caterpillars, brown-tail moths, plant lice, leaf hoppers and horntails. They are entitled to the reputation of being one of our best caterpillar destroyers, but they may also be seen making short dashes into the air to capture insects on the wing. During the nine days the young remain in the nest, they are fed insects almost exclusively. During this period, the parent birds are just too busy to continue being as shy as they seem to be at other times.

The National Wildlife Federation is pleased to call your attention to one of our most useful birds, the Chestnut-sided Warbler.
—E. Laurence Palmer.

Don't blow a fuse—

ADD TO YOUR WIRING!

This poor fellow doesn't realize that modern wiring can untangle his sorry situation. He's not alone either. Your home may be among the 4 out of 5 homes today where comfort and convenience are snarled up by out-dated wiring.

Like most modern families, you've added a score or more appliances to serve your electrical way of life. But the wiring in your home has not kept pace. It's overloaded. Such wiring cannot power your appliances properly. It wastes the current you pay for—adds drudging hours to household chores.

Want to banish the strangling entanglements of old wiring? Just add to your present wiring — modernize it! You'll hardly notice any interruption of electric service. At no obligation, your electrical contractor (see YELLOW PAGES in phone book), or nearest CP&L office can advise you.

FREE BOOKLET! Planning to buy, build or remodel? "The ABC of Home Wiring" is a handy guide. Supply is limited, so write or call your CP&L office for your copy soon!
