SPEAKING OF HOMEMAKING BY MRS. ELIZABETH G. PARHAM Home Service Representative of Carolina Power & Light Company

Wash Color Into Fabrics Color plays an exciting role in modern living. From scarves to skirts to draperies and dustpans, color is here. Today you can tint or dye almost any type of textile or fabric. You can change the color of your dresses, table linen or draperies almost as easily as you wash the clothes, particularly if you have an automatic washing machine. The quickest and easiest way to achieve or renew old color is through tinting. Tinting is usually reserved for the lighter colors - pinks, blues, greens, yellows, goldens, browns. Tinting tends to be a more temporary coloring process, for fabrics may lose their color after repeated laundering. Black, navy, dark brown, and red should be fast-dyed. The washing action of the washing machine assures an even spread of dye throughout the fabric. Also, it aids in the thorough penetration of the dye, giving depth of color and a more lasting quality to tinted articles. Tinting in the washer simplifies the handling of large pieces such as draperies, bedspreads, slip covers, and hanging rugs. There, too, a number of smaller articles can be tinted at one time. Before tinting be sure that the material is washable and that it is clean. Make sure that you have an ample supply of hot water, the hotter, the better. Stains and spots should be removed before tinting. Wash the article and rinse thoroughly. Dissolve the proper amount of dye in a pan of hot water on the range. Heat to simmer but do not boil. Dissolve and strain through a clean cloth into another pan. Place the material or garment into washer and fill machine with hot water. Add the dissolved and strained dye solution. Start the washer immediately and set the dial to give you the longest possible time cycle. Rinse, using the normal rinsing cycle. Hang up material or place garment on a hanger until almost dry (but still slightly damp). Press on wrong side.

MAKE AUTOMATIC DISHWASHING EASIER Load your dishwasher this fast easy way: Hold dishes under running water with your right hand, scraping them lightly with a knife or rubber spatula held in your left hand. Left to right loading saves passing dishes from one hand to the other, makes the job go quicker! (Of course, this procedure will be reversed for machines installed to left of sink.) Load the bottom level of the dishwasher first - pots, pans, and bowls to the outside, with their openings toward the center. Then alternate small and large plates to the inside. This will enable your dishwasher to more thoroughly clean heavily-soiled pieces. Load the top level last - cups in the outer section, with saucers behind them, odd pieces to the outside. Glasses go open end down in the innermost section. Place silverware, handles down in the silverware basket, making sure no pieces stick out through the sides of the basket. Fill the detergent cup, or add detergent according to manufacturer's directions. Dishes can often be washed only once a day. It is often possible to save time by rinsing the dishes of food scraps after each meal and placing them in the dishwasher. Then, after dinner, the machine can do an entire day's dishes. Don't forget to take advantage of the automatic dishwasher's versatility. Use as a plate warmer. In newest machines it is possible to stop the machine after the rinse cycle, delaying the final drying period to warm the dishes just before the next meal. The dishwasher is also helpful for housecleaning, canning, preserving, etc. The automatic dishwasher can do many of these big cleaning jobs, such as washing bric-a-brac, sterilizing jars, even cleaning children's metal toys.

Special Program For Youth Rally If you are not attending the Youth Rally, which is held in the American Legion Hall every Saturday night at 7:30, you are missing many blessings. The meetings are for old and young alike and everyone who attends says that they are glad that they do. On April 14 there is to be one of the most inspiring programs yet. The Christ Harvesters Trumpet Trio, who were in Latin America last summer, will be on hand to present a very special musical program. These boys, who could have been high in the entertainment world, have given their talents and lives to God, and they are some of the most outstanding musicians at Bob Jones University. Be sure and be there to hear them play and give their testimony.
