**This man escapes taxes that you have to pay**

He's not dishonest—or doing anything illegal. But present federal laws give him and many other people an unfair advantage over you and most Americans as far as some of your taxes are concerned.

Here's how:

More than 20 cents out of every dollar you pay for electricity goes for taxes. But under present tax laws, several million families and businesses escape paying most of the taxes in their electric bills that you pay in yours. They are people whose electricity comes from federal government electric systems. Unlike you, these people pay no federal taxes at all and little or no state or local taxes in their electric bills.

What's more, the taxes they escape have to be made up by other people—including you!

Most Americans believe everyone should pay his own fair share of taxes. How do you feel about it?
