HUNDREDS PARTICIPATE IN REC PROGRAM Several hundreds of children of various ages have enjoyed the Operation Youth program this summer. The varied activities offered made the recreation interesting to many children; the fall and winter activities should prove just as well attended as the full time program continues. The employing of Walter L. Cook as full time recreation director, a man professionally trained for the work with young people, and Ron Hallberg, Indiana University undergraduate who has been here this summer, have given the impetus to the recreation program which has made it so popular.

The summer program started in early June with sports and games, arts and crafts, dancing, social recreation, nature and outing activities which have kept the youth of our community occupied this

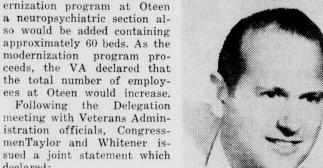

year league around anywhere. Each team played in 16 reg-
