Counties Are Allocated Funds For Roads

Meeting briefly in Raleigh recently following their swearing in ceremonies, the State Highway Commission allocated \$6,325,460 for Secondary road improvement for the current fiscal year. The allocation represents approximately one-third of the total amount which will be available for rural road improvements for the current year. Remainder of the funds, some \$12,000,000 will be distributed among the various counties at a later meeting of the roads body.

In explaining the allocation to the new Commission, Chairman Merrill Evans said it was necessary to distribute a portion of the money now since a few of the highway divisions have completed work on previously approved projects. Evans did say, however, that the \$6,000,000 allocation was not set aside for any particular road projects in the State, such project approval being a decision which the Commission itself will make.

In other business Evans distributed a list of the various counties for which each of the Commissioners will be responsible. The area of responsibility varies from as few as four counties to as many as ten counties for one Commissioner. The new Commission is composed of 18 members and a full-time chairman.

Allocation of the above mentioned funds for Buncombe and McDowell counties is as follows: Buncombe, 551.8 unpaired mileage and \$110,360 allocation; McDowell, 252.4 unpaired mileage and \$50,480 allocation. This distribution of money is based on a standard \$200 per mile for each county's unpaired secondary roads.

In accordance with the section of Statutes dealing with assignment of Highway Commissioners Yates Bennett is assigned Buncombe county along with Haywood, Madison and Yancey. Jack Kirksey will deal with McDowell and also Avery, Burke, Caldwell, Mitchell and Watauga counties.
