The Great Discovery From the first glimpse of Christian Science, the eternal Truth has been accompanied by signs of healing. The revelation came in 1866 to Mary Baker Eddy as she la, dangerously ill after a fall Accustomed as she was throughout her life to pray to God and to turn to her Bible for comfort and help, she called for it now and in her extremity opened it at the passage which relates the healing by Christ Jesus of the

man sick of the palsy While pondering this account Mrs. Eddy suddenly gained a glimpse of the Principle underlying the healing power of God which was manifested by Christ Jesus. She saw 'hat God, divine Mind, is the first and only cause and that adherence to the First Commandment, "Thou shalt have no other gods before me," casts out the evils of mortal mind thus healing the sick

As immediately as the palsied man was restored to health, she herself rose up and walked. Thereafter, her life was devoted to the discovery and elucidation of the Christly method of divine heating and the utilization of it for the benefit of all mankind

For twenty years prior to this experience, Mrs. Eddy had investigated the methods of medicine and homeopathy. Her ex-perience in the e fields of therapeutics had convinced her that the cause of disease is mental and that the divine Mind alone can produce a cure. Now it was revealed to her that saile all real being is the manifestation of God, the divine Mind, and is therefore perfect, the discords of huma. existence-even material existence itself-are images of erring, mortal thought. They are the opposites of Truth, evolved mortal, so-called mind. falsely believing in a power, presence and law apart from Go good produces its own phenomena in the material body and the woes of the flesh These are never more than the subjective state of mortal mind which seen real to the senses but which, in fact. have no more substance and permanence than shadows in a

Consequently, because material inharmony is produced mentally through fear, ignorance or sin, it can be removed only through the action of the divine Mind When one denies these errors and replaces them with love, understanding, and other qualities of God, spiritual regeneration takes place, and this finds its outward manifestation in the healing of material inharmony

In order that the understand ing of God's law might never again be lost Mrs. Eddy then recorded her discovery in detail Her main work, the textbook of Christian Science, "Science and Health with Key to the Scrip contains a full explana tures." tion of the Science of divine healing and, as its name implies, is intended to be read in conjunction with the Bible. On the cover of this book and of all her other writings, appears the emblem of the cross and crown encircled by Jesus' words: "Heal the Raise the dead Cleanse the lep-

Cast out demons. When Christ Jesus sent out his disciples to preach the gospel to mankind he gave them instruction to heal, and we hear that they returned full of joy and gratitude for the wonderful works they were able to perform We have no record in the Bible that he withdrew or modified this instruction, and by healing he sick herself and showing us how we may likewise demonstrate the healing Principle through the acknowledgment and application of God's law of universal harmony, Mrs. Eddy was faithful to

the Master's command. The Bible foretells the appearing of the Comforter, the divine message of Truth which would lead mankind into all truth Thousands whose lives have been transformed through Christian Science bear witness that this divine Science is that promised Comforter. Recognizing that it is through her discovery that they have gained a true understanding of God and of man's unity with Him, Christia Scientists love and are grateful to Mary Baker Eddy. They acknowledge her to be the revelator of Christ, Truth to this age; they revere her because she discovered the Science which Christ Jesus demonstrated they trust her as their Leader and strive to practice more effectively the divine Truth

which she revealed. Explaining the source of his power to leat, Christ Jesus told his disciples (John 14:10): "The Father that dwelleth in me, he doeth the works." He knew that it was through the Christ, the divine nature, that God gave him this power. This same Christpower is available to all men in proportion as they also reflect the divine nature,—this is the great discovery that Mrs. Eddy has given to the world. Her own remarkable power to heal the sick sprang clearly from the spiritual qualities she derived from God through Science—qualities

wonderfully evident in her life. Christian Science reveals that Spirit acts through its qualities to destroy not only the beliefs and propensities of mortal mind, but also the woes of the flesh which are the manifestation of these errors. Mrs. Eddy says in Science and Health (p 243): "Truth, Life. and Love are a law of annihilation to everything unlike themselves, because they declare noth-

The Church of Christ, Scientist This Church, whose branches

now encircle the globe, originally conceived in 1879 on this simple and profound basis (Church Manual p. !7): "To organize a church designed to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of

The element of Christian healing permeates every activity of the Christian Science Church. ndeed its many branches in all parts of the world are formed and stablished by grateful people who have themselves already experienced healing The several usand practitioners listed in The Christian Science Journal the weekly Lesson-Sermons, the Church services and Sunday School exercises, the Reading Rooms, periodicals and lectures have all this same purpose of healing. For example, a friend of mine was healed of a severe condition of eczema when she attended her very first lecture on

A Healing of Eczema One Sunday morning a newspaper advertisement for this lecture caught the eye of this young woman She was an active member of an orthodox Christian church, but when she saw the notice she felt drawn to attend the lecture and find out more about Christian Science At the time she had been under medical care for several months for the condition of eczema which covered both her hands, and was using various remedies for its but, knowing very little about Christian Science, it did not occur to her that her physical condition could in any way be

improved by it Leaving her household tasks she put on her hat and hastened to the lecture. Throughout the hour she liste ec intently, enjoyed what she heard and felt she would attend another lecture as the opportunity occurred. On her arrival home she went

to the medicine cupboard to treat her hands with their usual lotion when suddenly she realized that the rash had almost disappeared One hour of learning about the Science of God Spirit, had achieved more for her than months of reliance upon matter Without further material treatthe condition entirely vanished within two days, never to return. That was the end of

the trouble Healings such as this are normal and scientific, they are not supernatural. They come about through the operation of divine law, for, when spiritual understanding takes the place of false mortal belief; when kindness. compassion and forgiveness replace criticism, animosity and resentment; when the light of love outshines the shadows of fear and hate, and spiritual satisfaction and peace replace discontent and rebellion, then the real nature of man in God's likeness is revealed in all the beauty and grandeur and harmony which he was endowed from the beginning by his heavenly Fa-

Christ Jesus said to Nicodemus (John 3:7): 'Ye must be born again." In order to gain the health, nappiness and harmony which constitute the kingdom of heaven, our thinking must transformed We must forsake mortal error and material theories, and by reversing the testimony of the physical senses, learn anew what God, Spirit, is.

The Nature of God as Love Christian Science assists in this rebirth by defining God in seven synonymous terms, and I quote from Science and Health (p. "Gop: Divine Principle. Fruth, Love, Soul, Spirit. Mind." Reasoning from the basis that God is the creator of the true, spiritual universe, including Christian Science deduces that the real man is, in fact, Godlike,-he is God's expression governed by divine Principle. He is spiritual, altogether lovely, forever perfect and good. He is not. the material senses would claim him to be, material, changeable, discordant, mortal.

When we grasp this true understanding of man's being and it take possession of our thinking, we are transformed. Our whole outlook and behaviour are changed. Our experience in daily affairs becomes grander. nobler, sweeter. We are at peace with ourselves and each other. Disorder, disease, discord, dis-satisfaction vanish in this spiritual transformation, and we come into an enjoyment of life never before imagined.

This transformation comes gradually as the result of a deep desire to know and do the will of God. It comes through prayer. Christian Scientists pray daily in the words of the Lord's Prayer: "Thy kingdom come." prayer acknowledges the presence and power of God and expresses the longing to live in accord with the pattern of true. Godlike being shown in the life of Christ Jesus. This involves daily watchful care to eliminate from our thinking all tha is unlike God and to express only the divine qualities implied in the seven names for God which I have just quoted.

St. John wrote (1 John 4:7): "Beloved, let us love one another: for love is of 3 d; and every one

Denying the physical evidence of inharmony which according to medical diagnosis was dangerous to life, she claimed the present operation of the divine law of harmony in every action and function of her patient. She continued for some 'ime with this line of thought, reasoning from perfect cause to perfect effect, reversing the testimony of the senses and realizing the present perfection of man, until she felt a wave of joy in the knowledge of the infinitude of divine

The following day the patient was out picking flowers when the doctor called to see her sister. Seriously he begged her at least not to go out of the garden. But within a few days, completely healed, she traveled home several hundred miles, and thereafter enjoyed an active life free from trouble with her heart. Man's Spiritual Being Appearing

The practice of Christian Science does not involve the alteration of a belief of discor by a mere belief of harmony. It is the recognition and demonstration of man's true being as described in This healing Christ which the the first chapter of Genesis where it is recorded that God made man in His image. This man of God's creating is purely spiritual because he is the expression of God, Spirit; he is intelligent because he is the manifestation of God, divine Mind; he is upright. symmetrical, governed by the law of harmony because he is the image of God, Principle: he manifests the unimpaired, spiritual senses of Soul, God; he shows forth the indestructibility of eternal Life, the absolute perfection of immutable Truth, the grace and attraction of divine Loveall the beauty, grandeur and glory of God belong to him because man is made in the image of God and is maintained in His likeness. He is unfettered by human theories of material limitation. His capacity to express the substance of spiritual qualities is infinite.

This is the true nature of man. the spiritual manifestation of God, the only man there really This is the truth of each one of us, yesterda, today and forever-the true nature which we learn in Christian Science to claim and to demonstrate.

Need for Spiritual Development Perhaps some may say: "But

what about the mortal, inaterial body? How do you reconcile the Biblical record of spirittal man with the apparent fact that mortal man exists as a material Where did thi come from?" Mrs. Eddy was conversant with current theories of evolution and discusses in her writings the theories of Darwin But from the heights of spiritual vision she draws a clear distinction between the true, spiritual man derived from God, Spirit and the false, mortal belief of man appearing as a material body which begins as an unconscious microscopic chemical organization and later develop, into a complicated, articulated, highly sensitive body By this explanation man is a nortal, evolving through the accumulation and reorganization of material atoms. becoming more complicated at each stage of development. But is man primarily dust? If

so what is th explanation of one's spiritual nature? How can one have, as he plainly has, the capacity to think, to love, to be happy, to express the qualities of honesty, joy, patience, serenity and the like? Can dust express the qualities derived from Spirit? Why, no. What, then, is this material body? Christian Science shows it to be only a human concept, the subjective state of mortal thought which changes according to the mental cond. tion of the individual. Mrs. Eddy says in Science and Hea'th (p 199): "Mortals develop their own bodies or make them sick, according as they influence them through mortal mind." The responsibility for mankind's unfolding health and happinessinceed its survival-therefore rests upon spiritual development, upon the ever-increasing expression of the characteristics of God. Spirit, the one and only creator of the immortal universe

Thinkers of today are seriously considering whether sufficient emphasis has been placed upon the importance of spiritual growth and evolution, for without this development in grace there is small hope of mankind's sur-

vival. Christian Scientists are dedicated to the activity of spiritual growth and to obedience to the laws of Spirit. They look for and pray daily for the development in their own lives of divine Science. This development they recognize to be the Holy Ghost which now, as in the days of Christ Jesus and his disciples, is accompanied by signs of great spiritual power and works of healing. Mrs. Eddy defines "Holy Ghost" in Science and Health as (p 588): "Divine Science; the development of eternal Life Truth, and Love." Is not this the solution to all our problems? The development of man's true spiritual selfhood which has existed in God's likeness throughout eternity, but which the belief that man is materially evolved has seemed to obscure? As the qualities of God, eternal Life, Truth and Love, develop in our experience we inevitably enjoy increasing health and happiness. What this spiritual growth does for us individually it will likewise do

Gur Work for the World My friends, let us not doing our part to restore a balance on the side of spiritual growth in the world today. Let us bear witness in thought and deed to the presence of eternal Life and its manifestation spirit. ual and perfect man; to the truth of all God's creation in His and likeness, and to the action of divine Love through the expression of Love's qualities Above all, let us strive to realize the supremacy of God's government. Let us have faith in His disposal of events and gratefully acknowledge each sign of heal ing which points to His rule of universal harmony appearing in present-day experience.

Who can estimate the farreaching effects of such prayer on our part? Addressing a class of 65 students Mrs Eddy once said (Miscellaneous Writings 279 27 "We, to-day, in this class-room, are enough to convert the world if we are of one Mind; for then the whole world will feel the influence of this Mind."

As we pray for that Mind to be in us "which was also in Christ Jesus" we discover that the quality of gratitude becomes increasingly active in our thinking Gratitude has an important of in the lives of Christian Scientists Each Wednesday me are held in their churches at which testimonies of healing are

A Business Problem Solved A friend of mine gained her first ray of light on a sericu business problem while attending a testimony meeting. At the time her thought was overcast and stormy with resentment, for, that very week, she had received an alarming report of the failure of a business from which she and her family derived their income This business had prospered over a long period on a solid foundation of service to the public, but subsequent to the passing of the management to other hands had seriously deteriorated. Dividends ceased and final uquidation at a total loss seemed inevitable. Reports from accountants and lawyers showed the utter hopelessness of the position, and in spite of the many healings she had experienced in Christian Science iend felt helpless to tackle a problem which had proved be-

business advisers to solve. At this Wednesday evening meeting she heard the account of a physical healing from the effects of a fall which had been brought about by the individual's reversing the testimony of the material senses and maintaining the true facts of spiritual being. A second speaker gave thanks for the solution of a problem concerning the selling of a house through the application of divine

metaphysics. These two testimonies awakened my friend to realize that she, problem through Christian Science She wrote out on a piece of paper all the references she could find in Mrs Eddy's writings to the reversal of the evidence the senses, such as (Science and Health 120 7) "Science everses the false testimony of the physical senses, and by this reversal

mortals arrive at the fundamental

facts of being For several months she studied these passages daily and faithfully corrected her concept of the business and these responsible for its direction. She now saw it as representing an idea of Soul which could not be curtailed or be insecure or impeded in any way. She reversed her thinking about the directors of whom she had thought so bitterly, and she saw them as expressions of God, manifesting intelligence and alertness. Moreover, she gained a great sense of spiritual peace on the whole question, realizing that, as Christian Science teaches, she could never be separated from what was really hers as the manifestation of divine Love. In fact her whole thinking on the matter was transformed.

Then, one morning, to her joy she received a letter saving an offer had been received to take over the business at a sum running into six figures, and not only that, but dividends were to be paid up for the past three years. The problem was solved.

Gratitude Brings Healing Now all this good flowed to my

friend through the gratitude expressed at a testimony meeting. Gratitude is a powerful healing agent; it is a joyous affirmation When faced with a multitude to feed in a desert place Christ

Jesus prayed, he lifted up his eyes, away from the material evidence of lack, and gave thanks to God. Reversing the evidence of the senses, he expressed gratitude for the abundant supply which he knew God is always pouring forth to His beloved children The result was immediate mortal picture or lack was reversed. All were fed and satisfied and there was plenty over

Christ Jesus is the Way, and his method is the pattern for us all to follow in our need. Christian Science has revealed to us the divine law of universal harmony underlying the Master's great words. It has restored primitive Christian healing to the world It has shown us the way to be well and happy and fearless. Let us go home today with hearts full of gratitude for all God's spiritual gifts-gifts which perhaps have not yet seen but which we know must be flowing from the infinite source of all good. Let us live in accord with the perfect law of Love, having that Mind in us which was also in Christ Jesus. Then the prophet's w will be fulfilled (Hab. 2:14): the earth shall be filled the knowledge of the glory of the Lord, as the waters cover the
