Telephone Talk

LISTED?
New Asheville telephone directories will be delivered about the middle of May, 1969. Now is the time to make changes in your listing if desired. But most important, this is the time to add that listing of your teenage son or daughter or anyone else who lives with you and receives telephone calls. Many women are actively involved in church work and civic activities and find a listing of their name most helpful. How about you? You can't find a better buy for just 30 cents per month. Remember — the deadline for changes and additions for the new directory is March 27, 1969.

THE TORTURERS — The members of the Performance and Reliability group at Western Electric, manufacturing and supply unit of the Bell System, are really very nice people. But you should see them in action! It's their job to torture-test the mechanism of all telephone products, and they show no mercy. Their chamber of horrors includes a guillotine-like device which continuously slams receivers against tabletops, a wheelbarrow apparatus which spins telephone dials for two million revolutions, and a salt spray which exposes phones to the equivalent of twenty years of coastal climate. It's strictly a case of survival of the fittest, but all in a good cause—to insure the durability and dependability of the telephone equipment you use.

COUNT TO TEN. When you make a call, it's a good idea to let the phone ring about ten times before you hang up. Generally takes less than a minute, but it could provide the few extra seconds someone needs to answer the phone.
