SCHOOL NEWS

Students in Miss Cindy Gilbert's first grade have been busy watching six chicken eggs. Four of them hatched and are being carefully held by some of the children in the class. Pictured are [l-r, front row]: David Fulbright, Freddie Ely, Matthew Dodd and [back row] Tommy Ruit, Jaime Tigar and Kristy Hart.

The eggs were 21 days old when they were brought to the classroom and hatched in eight more days. The youngsters take turns feeding them crumbles of cornbread and water. This was a science project and was also done by two kindergarten classes.

Carol Massey is the aide for the class.

Professional potter Sarah Struby is shown helping children in the first and second grade at Carver school learning something about the visual arts. She has asked them to find shapes hidden in a painting as an exercise in "seeing," not just "looking" at a painting.

WWC renews 100 per cent tuition

financial resources to attend At a time when colleges face increasing financial strain due an independent college." to federal aid cutbacks, War-Student aid at the college

which goes to students who grant funded by the General graduate from high schools Assembly for all legal resiwithin the twenty-two counties dents of the state. of western North Carolina.

All resident students at Warren Wilson work fifteen hours a week on campus in jobs ranging from plumbing to secretarial work, computer maintenance, farming, and electrical work. They receive room and board in return, cutting their college costs by up to one third.

Rob Glass, Director of Admissions, noted that admissions are up 22 percent this spring over last year. While Glass did not attribute this increase primarily to Warren Wilson's financial commitment, he did believe this commitment "will have a dramatic impact on the number of students that finally enroll at Warren Wilson."

dent of Warren Wilson, re- that financial aid will be as ported that, "I am glad to say generous as ever. "We have the college is operating in the always helped students get black, and we have no long- their education whether or not range debt." Because the college is in such solid shape he commented.

ideal that we all try to best achieve. But a glance in a full-length mirror may tell a different story. Poor posture with sloping back and protruding stomach not only affect your personal appearance, they affect your health as well.

Not everyone can be as active as they want to be. If your work requires you to sit at a desk most of the day, you may suffer from lack of exercise. Overeating can put undue strain on unused muscles and back. So can poor posture. These things, combined with lack of exercise, may lead to back pain and nervous tension.

Instruction in how to maintain good posture can be helpful. So can tips on how to eat a well-balanced diet without gaining unwanted pounds. So can treatment to correct any misalignments in your spine that may be causing aches and pains and other signs of tension. If your body is operating at 90 percent, why suffer in silence when you could be functioning at 100 percent.
