> Queer Law Case

The daily papers not long ago reported a trial case where a man sued a medicine concern which had offered a hundred dollars for a case their remedy could not cure. It seems that the man had not been cured, though he had taken the remedy. The defence was that he had not taken the medicine long enough. He did not get his hundred dollars.

We allude to this because Vinol does not give a slippery guarantee. We sell it on its merits and leave it to the user. If the user comes back with his empty bottle and says: "I took that bottle of Vinol, and I can't see that it did me any good," we don't argue the matter. We say, or our clerk says, "Sorry that you happen to be among the few - here's your dollar ! "

The few! They are very few -less than one out of a hundred, according to the experience.

Vinol is a scientific non-secret compound of cod liver oil (greatest medicinal food known), organic iron (iron that can be taken up into the blood and used), and a mild table wine. It is pleasant to take. Our Vinlax, for constipation, is Vinol's companion remedy, sold on the same guarantee.
