LIVE STOCK

SUN REDUCES CHOLERA BILL

Unwise and Uneconomical to Depend Entirely on Serum to Protect Swine From Disease.

A few days' work in the pig pens and yards scraping, disinfecting and cleaning is pretty good hog-cholera insurance, says the United States Department of Agriculture. Strict sanitation is the best aid the farmer can

Hog Cholera Thrives in Such Surroundings as These.

give to the work of the hog-cholera serum. It is unwise and uneconomical to depend entirely upon the serum to protect the swine from this costly disease. In 1918 the farmers paid a serum bill of over \$5,000,000 and they still lost \$8,000,000 worth of pigs. There can be no doubt as to the effectiveness of the serum treatment, but the sensible farmer will do what he can with shovel, hoe and disinfectant to remove the cause of the trouble. The threat of cholera is always present so long as there are undrained cesspools and wallows. Straw stacks should never be left from one year to the next if they are where the hogs can reach them. Shelters and pens should be so constructed that they may be easily cleaned and exposed to the sunlight. A few days devoted to work of this sort in the fall when the hogs have been taken from the pens will do much to protect the herds of another year.

PROSPECTS FOR CATTLE MEN

Nebraska College of Agriculture Encouraging Farmers to Increase Their Operations.

The Nebraska College of Agriculture is encouraging farmers to expand their live stock operations. The scarcity of all kinds of stock, especially cattle, points to continued good prices. With feed prices going lower better days seem to be near for both the live stock raiser and the live stock feeder. While it is true that many feeders lost money in the last two years, feed prices may be 50 per cent lower than last year. Likewise cheaper feed and labor should stimulate live stock raising. The number of cattle in the United States has been decreasing at an alarming rate. The number in the United States has decreased from 80 head for every 100 persons in 1900 to 42 head in 1919. During the same period the rate of slaughter increased 3,000,000 head annually. Some people go so far as to predict that in a few years only millionaires can have beefsteak on their tables, unless live stock production is stimulated.

FORAGE FOR BREEDING EWES

Supply is Necessary to Produce Strong, Vigorous Lambs—Helps to Balance Ration.

Breeding ewes must have some good forage in order to produce strong young, and the growing and developing lambs must have it in order to make good healthy ewes for breeding, and the fattening sheep should have some good forage to help balance their ration. Grain alone fed to sheep that are intended for the block will not produce the best results. They must have a combination of feeds, with some good forage forming the principal proportion of the ration.

FAT HORSES ARE PREFERRED

Farmer Makes Mistake in Disposing of Animals When They Are Somewhat Run Down.

It is better for the farmer who has horses to sell not to dispose of them when they are somewhat run down, following a hard summer's work, but to fatten them up. A fat horse always brings a much better price even though he be an inferior horse.

BROOD SOWS DURING WINTER

Should Be Maintained as Cheaply as Possible and Yet Farrow Healthy Litters.

During the winter the brood sows should be maintained as cheaply as possible, but at the same time they must be properly fed in order to farrow a large number of healthy, well-grown pigs in the spring.

ADVERTISING

The Power of Advertising.

"The January business in Marshall Field & Co.'s retail store in Chicago was the biggest in all its history. It was the biggest in the amount of money received for goods. And most important of all, it passed all records in number of individual sales. You know what Field, Carson, Pirie, Scott & Co., Mandel Bros., and the other Chicago department stores have been doing in the way of advertising since the first of the year. They kept at it day in and day out. As a result State street nearly always is jammed and not with bargain hunters either."—G. A. Nichols, in Printer's Ink.

The Important Point in Advertising.

"It matter not whether we are advertising soya, real estate, millinery or motor trucks, we are appealing in every instance to an abstract something that, for want of a better name, is called human nature. It is more important for an advertising man (because he deals with the mind through the eye) to know how the human mind responds to impressions made in printer's ink, than it is to know the manufacturing secrets of the man whose story we are going to tell."—Frederick Seid in Western Advertising.

Advertise Convictions.

"There is scarcely any portion of the daily newspapers more eagerly scanned these days than the containing news of plants reopening. And such news is of course legitimate and interesting. Yet Julius H. Barnes, president of the the Klearflax Linen Rug Co., purchased full-page advertising space to tell the public his action in going back to full-time production."—Printer's Ink.

CERTIFICATE OF DISSOLUTION.

State of North Carolina—Department of State.
To all to whom these presents may come—Greeting:
Whereas, It appears to my satisfaction, by duly authenticated record of the proceedings for the voluntary dissolution thereof by the unanimous consent of all the stockholders, deposited in my office, that the Buffalo Manufacturing Company a corporation of this state, whose principal office is situated in the town of Shelby, county of Cleveland, State of North Carolina (Chas. C. Blanton being the agent therein and in charge thereof, upon whom process may be served), has complied with the requirements of Chapter 21, revised of 1905, entitled "Corporations," preliminary to the issuing of this Certificate of Dissolution:
Now, therefore, I, J. Bryan Grimes, Secretary of State of the State of North Carolina, do hereby certify that the said corporation did, on the 19th day of March 1921, file in my office a duly executed and attested consent in writing to the dissolution of said corporation, executed by all the stockholders thereof, which said consent and the record of the proceeding aforesaid are now on file in my said office as provided by law.
In Testimony Whereof, I have here to set my hand and affixed my official seal at Raleigh, this 19th day of March, A. D., 1921.
J. BRYAN GRIMES, Secretary of State.

APPLICATION FOR PARDON OF LONNIE HOPPER.

Application will be made to the Governor of North Carolina for the pardon of Lonnie Hopper convicted before the county recorder for the crime of larceny and sentenced to the roads for 12 months. He has served 8 months of this time.

All persons who oppose the granting of said pardon are invited to forward their protests to the Governor without delay.
This the 22nd day of Mar., 1921.
PEYTON McSWAIN, Attorney.

Last Call
FOR
1920 Taxes

I wish to notify all persons who have as yet not paid their 1920 taxes that I must have same by the last of May 1921. I know that this has been a hard year on the farmers of this County and I have no desire to force collections, but at the last monthly meeting of the Board of County Commissioners I was ordered to force collections on all taxes that are not paid on the 1st day of May 1921.

The County and State are badly in need of funds so kindly make your payment just as soon as possible. I recently received an urgent request from the State Treasurer for a settlement in full, but have deferred this in order to keep the County Treasurer in funds.

Therefore unless you wish to add further costs for collecting let me have remittance before the above date and if possible let me have the amount at once.

Hugh A. Logan
Sheriff Cleveland County

Durable

Life-long roof service under exacting conditions, life-long weather protection, life-long attractiveness and life-long fire-resistance—such is the service of the Vulcanite Hexagon Slab Shingle.

For it is made from tough fibrous felt thoroughly saturated with asphalt—making it waterproof and durable. It is surfaced with crushed slate, either in a slate green or deep red color—making it attractive and fire-resisting.

Don't buy a roofing that will not give you these four roofing qualities.

See this shingle at
