

GOLLY!
LOOK WHAT'S HERE!"

"Santy must have heard about my wish. A Bicycle! Just what I've been telling Daddy I wanted."

Such will be about the average exclamation of the youngster who receives one of our Bicycles for a Christmas Gift. And why shouldn't he be happy? A Bicycle provides him with a recreation he desires and which is highly beneficial to his health.

So we ask you Fathers of Cleveland County to stop in and see these models.

Gigantic Electric Plant in Operation

The Mountain Island Hydro-Electric Plant Completed After Two Years of Hard Toil.

The Southern Power company will during the coming week put into operation the Mountain Island hydro-electric plant which is just being completed after two years of constant and strenuous work. This is the 19th hydro-electric plant to be put into service by the Southern Power company, nine of them being on the Catawba river. The addition of this plant to the Southern Power company's system gives that company a total of 451,000 horsepower generating capacity in hydro-electric power stations. The 105,000 horsepower of generating capacity in steam plants gives it a total generating capacity of 556,000 horsepower.

The putting into commission of the Mountain Island plant is equivalent to the opening of a coal mine that would put out 500,000 tons of coal a year, or nearly 2,000 tons a day, not including Sundays and holidays, it being estimated that the new plant will produce 120,000,000 kilowatt hours of electricity a year. This amount of power would drive approximately one fourth of all the cotton mills in the state of North Carolina today; or it would provide motive power for 120 new mills of 10,000 spindles each, giving employment to approximately 16,000 operatives who, in turn, would support a population of approximately 150,000 souls.

The total generating capacity of the Mountain Island plant is 80,000 horsepower, the generating equipment consisting of four 20,000 horsepower units. The dam and powerhouse were constructed under contract by Rheinhardt and Dennis, the contract having been let just two years ago. The waterwheels and governors were supplied and installed by S. Morgan Smith of York, Pa. The Allis Chalmers Manufacturing company of Milwaukee, manufactured and supervised the installation of the huge generators. The switchboards, transformers and oil switches were manufactured by the General Electric company, of Schenectady, and were installed by the engineers and experts of the Southern Power company.

FOUNDATION LAID FOR NEW PAPER AT NEWTON

At the last Kiwanis meeting the foundation was laid for a new paper in Newton. It will start either as a daily or as a semi-weekly with the purpose of becoming a daily within the first 12 months.

E. W. G. Huffman, managing editor of the Salisbury Post, will be the editor and the largest stockholder. Mr. Huffman was present on invitation of the Newton club and in a concise and straightforward statement, made two propositions: First, to buy the News-Enterprise, if it can be bought, and continue it for six or eight months as a semi-weekly and then start a daily edition; secondly, if the News-Enterprise cannot be bought to start a new paper.

In either proposition, Mr. Huffman said he had faith to the extent of \$7,000. His idea was to ask the people of Newton to supplement this with \$5,000 of stock, pay down on the outfit \$10,000, put in bank \$2,000 for running expenses and discharge the balance for which notes will be given out of the profits of the business.

WARNING TO ALL CAR OWNERS

When you store your car away, let us store your battery. When a battery is out of service, it should be stored away in some battery station that is able to take care of it for you, keep it in good condition and ready at any time you call for it. If your battery should be left in your car, leakage through the wires during its time out of service, it will discharge through the wires, causing the plates to sulfate and ruin your battery.

We re-charge your battery, repair and sell new ones. Give us your work. We sell Presto-Lite and Perfection batteries.

Four-Door Sedan Interior Features

A cozy, attractive interior has been achieved in the Ford Four-Door Sedan.

Broadcloth upholstery, soft brown with a slightly darker stripe, harmonizes with the lighter shade in the head lining. Silk poplin shades are provided.

Ornamental interior fittings including door handles, dome light base, window regulators and shade mountings are finished in nickel.

Doors are made of one solid sheet of heavy aluminum, very light and strong. Copper covered rubber door bumper prevents rattling.

A water tight windshield, easy and positive to adjust, cowl ventilator, and visor are other much appreciated improvements.
