Appropriate place and score cards were at each place. After the game it was found Mrs. Herman Eskridge had the highest score in bridge for which she received a beautiful lingerie set, and Mrs. Will Arey was the lucky winner in rook and her prize was a lovely satchet. Mrs. Ibur Baber and Mr. John Schenck, jr., received the consolation prizes two exquisite hand-made handkerchiefs. After the games a delicious hot menu was served concluded by an ice course.

Give Strict Attention to Feeding Dairy Cows
"In order to get economical production, farmers must pay strict attention to the feeding of their dairy cattle during the winter months, for feeding comprises more than one-half the cost of producing milk," says the dairy specialist at the New Jersey State College of Agriculture. "Home-grown feeds are the cheapest feeds the dairyman can get, and roughages, even at the high price of hay, are the cheapest of home-grown feeds. Alfalfa, clover and corn silage are the best milk producers; yet mixed hay and stalks can be fed to advantage if they are present on the farm."

"Those who have a supply of corn ears are fortunate. Corn and cob meal should furnish the basis of the ration. By the purchase of bran or oats and a few high protein concentrates a good milk-making ration can be compounded according to the following recommended proportions: Ten pounds of alfalfa or clover hay, 30 pounds of corn silage with all the bright stalks the cow will clean up daily, together with 900 pounds of corn and cob meal, 300 pounds of bran or oats, 200 pounds of gluten, 100 pounds of cottonseed meal, and 100 pounds of oil meal. The cost of this mixture will vary, depending upon local prices."

"If neither alfalfa nor clover hay is available it will be necessary to double the amount of linseed or cottonseed meal. If no silage or succulent feed is being fed, linseed meal should be substituted for the cottonseed meal. It is advisable also to feed beet pulp at the rate of three pounds per cow if silage is not available. The beet pulp should be fed when in a soaked condition."

"There is a distinction between cottonseed meal and cottonseed feed. Cottonseed feed contains a large proportion of hulls and has a very inferior feeding value, and should not be purchased if cottonseed meal can be bought."

"It is always poor economy to underfeed dairy stock; feed them enough to keep them in a good, thrifty condition. Cows in milk should be fed all the roughage they will eat and, in addition, one pound of grain daily for each three and one-half pounds of milk they give each day."

Uniform Laws Urged to Stop Spread of Disease

(Prepared by the United States Department of Agriculture.)
At the recent World's Dairy congress, held at Washington, D. C., Dr. John R. Mohler, chief of the bureau of animal industry, United States Department of Agriculture, suggested to the delegates that efforts should be made to obtain some uniformity in the laws of the various countries regulating international trade in live stock. Some move of this sort is needed now, said Doctor Mohler, because of the great extent of international trade in live stock, and because of prevalence of destructive animal diseases in many parts of the world.
Certain fundamental features which probably would be desirable for all countries were brought out in the statement made to the delegates. It was suggested that each country engaged in domestic and foreign commerce in live stock and its products should establish a competent veterinary service, and failing to do this should have no right to export its animals to be received in other countries; provisions should be made to prevent the spread of contagious diseases in the country, the introduction of infection from abroad, or the transmission of diseases to other countries; and there should be an international co-operative system of exchange of information in regard to animal health in the various countries.

WITH TRAP SET EXECUTION IS ORDERED STOPPED

Charleston, W. Va., Jan. 11.—Two hours before he was to have been dropped to his death from a gallows in the state prison at Moundsville late today, Jim Aiello, slayer of his brother-in-law and two children, was told that Governor E. F. Morgan had commuted his sentence to life imprisonment.

All preparations for the hanging had been made, and Warden S. P. Smith, after testing the trap, was ready to take Aiello from the death cell a few minutes before sunset, for the law decreed that he was to die as the sun went down. Aiello spent the day in prayer, and when the hour of 3 p. m. arrived, he gave up hope, ate his last dinner, said farewell to his wife and children, and donned the clothes in which he was to be executed.

At the same hour Governor Morgan was reading a flood of messages from Harrison county, the scene of the murders, from persons who beseeched him to show mercy. The error then notified Warden Smith that Aiello's sentence was commuted. The prisoner, given a new lease on life, was led smilingly from the death row to another section of the prison. A week ago today Aiello saw three of his fellow prisoners, members of a blackhand murder syndicate, taken from their cells to the gallows. Aiello was convicted of murder a year ago. He said he had been crazed

CHARLOTTE NEGRO GETS 20 YEARS IN THE PEN

Tom Williams, a negro, entered the residence of Mrs. W. S. Haines in Charlotte on November 16. The negro fled when she jumped out of bed but was captured as a result of her description. He pleaded guilty to second degree burglary and was sentenced to serve 20 years in the state penitentiary.
