

**Bobbed Hair is Now Fashion for Singles**

**If You Are Unmarried Get In Style With A Boy Clip, A Spingle Or A French Clip.**

All hair belonging to unmarried women must be bobbed before spring rolls around. It's the dictate of fashion with a capital F, coming as an advance notice from London.

Never in the reign of bobbed hair, Philadelphia hair dressers say, will they have so many heads to bob. The adelphi has already set in. Shears are working overtime, and presses are littering the floor around the chairs of busy barbers.

Single women, if they follow the styles, will have bobbed hair; married

women will wear their hair plastered close to their heads to give the effect of bobbed hair.

It is in the back will be clipped like that of a boy, the official designation of the style of headless being known as the "garden clip," which sounds French. In American translation is the "boy clip," and it is also called the "single" and the "French cut."

It is not only about her head, however, that millady will be a boyish person. Consider her spring frock.

It is short and semifitting, falling straight from the shoulders. White Elton collars and white turn-back cuffs make for trimness. The lines are straight and boyish, even angular, on most of the gowns.

Waists have disappeared, but if by chance one slips in, it will be just above the hips.

Dresses are much shorter, but there will be no return to the "just below the

knee" skirt. Paris to the contrary. In Paris, skirts are from thirteen inches to sixteen inches from the ground.

Small close-fitting hats, with high crowns, rule the head. Ribbons and embroidery are the trimmings on the chick straw hats of spring.

**Art.**

When the censor told the dancer that she'd have to wear more clothes,

"This is art that I'm displaying!" She snapped colder than the snows.

"If it's art you're displaying," Said the censor with a grin,

"That's a new name for the outfit I've been fond of swimming in."

The baseball fan will be with us soon and the electric fan is coming back also.

**Cloth Coverings Good Against Mild Frosts**

**Heat Generated During Day Is Conducted to Surface.**

(Prepared by the United States Department of Agriculture)

Coverings of rather heavy cloth laid directly over garden truck or other low-growing plants are effective in protecting against moderate frosts, the United States Department of Agriculture reports. The heat from the ground and the plants is thus conserved, and the losses of heat by radiation from the plant to the sky are cut off; moreover, the air movement is so slight near the ground that there is little tendency for the cold outside air to be forced under or through the covering.

The temperature of the surface of the cloth exposed to the sky is lowered by radiation and may fall to a low point, but as both the cloth itself and the air underneath it are very poor conductors of heat, the temperature of the covered plants falls much more slowly. The heat that has penetrated a few inches into the ground during the day is slowly conducted to the surface during the night and aids in keeping the temperature under the cover above the freezing point.

It is evident, therefore, that coverings of this kind should be placed early in the evening when a frost is expected, before much of the heat accumulated in the soil during the day has been lost. Tin cans or other metal coverings should not be used to protect plants from frost. Metals are good conductors of heat and are also good radiators unless very highly polished. Therefore the temperature is likely to fall nearly as low under a covering of this kind as in the outside air.

**Vitamins Essential for Laying Hens in Winter**

That green feeds are of great importance in the rations for laying hens is shown by the results of an experiment conducted by the University of Idaho poultry farm.

A lack of vitamin fat-soluble A in the ration was found to cause disease resembling rump. The eyes became swollen, the throats became full of small yellow patches, and post-mortem examinations showed a deposit of white material resembling powder on the liver and kidneys. Ten birds out of twenty-five died in one pen from this trouble. In an adjoining pen receiving cod liver oil, none died from this disease. Cod liver oil is an excellent source of vitamin A. However, cod liver oil cannot be recommended as poultry feed. It is necessary to furnish the birds feed containing this important vitamin. If maximum results are to be obtained, alfalfa, peas, lettuce, cabbage and spinach are all high in this vitamin. Besides, chard, dandelion greens, carrots and clover cuttings are good green feeds for maintaining the health of the flock during the winter months.

**Essential Winter Feeds for Average Hen Flock**

Too many poultrymen rely almost wholly on grain feeds during the winter. Green food, beef scraps, milk by-products and mineral matter are too often omitted altogether or fed too infrequently and sparingly. Oyster shell, prepared grit and charcoal, ready for the fowls at all times, provide mineral matter. Cabbage, beets, mangels and sprouted oats make excellent green foods; hung an inch higher than the head compels needed winter exercise. Any fresh vegetables, even raw potatoes, are a whole lot better than nothing of the kind at all.

For animal food, beef scraps serve the purpose splendidly. Milk by-products, when low priced, are used with excellent results and probably with greater returns, comparatively, than when fed to farm animals.

**Vigorous Gobbler Will Care for Fifteen Hens**

If good gobblers are scarce there is no reason why two neighbors cannot keep their turkey hens on the same farm until such time as they have been served by the gobbler. One service from the gobbler is sufficient to fertilize all the eggs that will be laid at a succeeding egg-laying period. However, when the turkey hens quit laying another service will be necessary before the subsequent eggs of the second laying period are fertile.

A vigorous gobbler will only serve about fifteen hens.

It would be somewhat less troublesome to transfer the turkey toin rather than the turkey hens. After one neighbor is positive that the gobbler has covered all of the hens on his farm the tom could be moved over to the other neighbor's farm.

**Most Effective Ration to Increase Egg Yield**

The most effective ration for feeding hens and pullets as found at the Ohio experiment station consists of mash, ground corn 6 parts, bran 3 parts, meat-scrap 5 parts, by weight. In addition a scratch ration of shelled or cracked corn is fed so that the fowls will consume twice as much of the grain as mash.

This ration decreased the cost of feed per dozen eggs more than 20 per cent as compared with other rations and increased the production per pullet more than 50 per cent. The tests were made to determine the amount of meat-scrap laying rations should contain.

**CHILD BURNED TO DEATH IN ROCK HILL, SOUTH CAR.**

The three-year-old daughter of Mr. and Mrs. W. A. Young of Rock Hill, S. C., was burned to death Monday when fire destroyed an outhouse in the rear of Young residence there. The body was discovered by firemen after they had extinguished the blaze. No one knew the child was in the building, it was said.

**DR. B. H. PALMER.**

Resolutions adopted by the Cleveland County Medical Society upon the death of Dr. B. H. Palmer.

Whereas on the 10th day of February it pleased Almighty God to remove from the scenes of his earthly activities our beloved brother it is resolved:

- 1.—That we bow in humble submission to the will of an all wise Providence in the removal of our brother physician.
- 2.—That the medical profession of Cleveland county loses an honored member who represented the best traditions of the profession.
- 3.—That we extend to the bereaved family our tenderest sympathy in the great loss which they have sustained.
- 4.—That a copy of these resolutions be sent to the family, the county papers, and a copy be placed upon the minutes of our society.

W. F. MITCHELL,  
E. A. HOUSER,  
E. B. LATTIMORE, Com.

**Have You a Cough or Bronchitis?**

**This Should Interest You**

Charlotte, N. Car.—"Dr. Pierce's Golden Medical Discovery has done wonders for members of my family, also myself. After I had the influenza I could not regain my health. I had a bronchial cough, was weak and my blood was thin and bad. I took the 'Golden Medical Discovery' and two bottles relieved me of all my bronchial cough.

"When my youngest child was about a year old he had bronchial trouble and nothing gave him any relief until I began giving him the 'Golden Medical Discovery' and he has never been bothered with that trouble since but has grown into a very healthy boy. I am sure the 'Discovery' saved his life, for I had given up hopes of his recovery from this ailment."

—Mrs. S. D. Faulk, 1405 N. Harrill Street.

You begin to mend when you start with "Discovery." Buy it now at your neighborhood drug store in tablets or liquid. Write Dr. Pierce, President Invalids' Hotel in Buffalo, N. Y., for free confidential advice.

**VIRTUOLO**  
Player Piano

**Thousands of happy hours**  
are yours playing the Virtuolo

No greater investment in happiness than the Virtuolo has ever existed. All the gaiety of the holidays, all the merriment is kept in the home all year round, and for year after year, by the presence of the Virtuolo.

Everyone can play in the finest manner on the Virtuolo. It is the easiest to play in every way. Merely a touch on the pedals brings forth music.

All the finest piano music is yours on the Virtuolo. Its tones are superb. It gives you complete control over all musical expression by levers placed right at the finger tips. It will last through a lifetime of playing.

**Sold on easy terms**

You can select any one of five styles in the Virtuolo to suit your taste and income. Let us play the Virtuolo for you. Play it yourself. Examine it in every detail. Come at once.

W. A. PENDLETON, Shelby, N. C.

Nearly a century of fine piano making is back of the Virtuolo—it comes in the following famous makes:

Hall & Davis \$685.5750  
Conway . . . \$550.5595  
Lexington . . . \$495

Liberal allowance for old piano

**You can paint for less with KURFEEES Pure Paint**

**THE HEAVY LEAD BODY of Kurfees Paint** forms a tough, solid film that is proof against extreme hot and cold weather. It hides the discolored surface. It's the lead in paint that forms the protecting film and retains the brilliancy of color. Kurfees Paint contains 20% to 40% more lead per gallon and will cover (hide) more surface.

Compare Paint Formulas—here's Kurfees  
Pure Carbonate Lead... 50%  
Pure Zinc Oxide... 20%  
100%

Tinted with Pure Colors, Ground and Mixed with Pure Linseed Oil and Drier—That's All.

It's the greater quantity of pure carbonate of lead in Kurfees Paint, scientifically combined with pure linseed oil that makes it flow smoother and more quickly under the brush. It saves time and work in applying, hides and protects more square feet of surface per gallon and lasts longer in the weather. You can paint better and for less with Kurfees. Come in and see the beautiful color combinations and let us show you how little it will take to paint your house right.
