Department of Home Economics Meets.
The Home Economics Department of the Woman's club met at the Central school building on Monday afternoon at 3:30. This department is one of the most fascinating phases of the Woman's club. Every one enjoys toothsome dainties and to learn how to use the delicious receipts, and see these charming women who are splendid housekeepers interested in this work making it interesting for others, makes one want to join this department. Monday was indeed an especially enjoyable meeting. Mrs. Fred Morgan had read up and received inside information from the best decorators told about "Draperies and Furniture." Mrs. A. W. McMurry and Mrs. Zeb Mauney made a salad that made "your mouth water" and Mrs. R. Lee Weathers boned a chicken like a surgeon. With these competent teachers much was learned, and the afternoon was most profitably spent.

Mrs. Hoey reading Mrs. Robert's paper on "Our Own Neighborhood," and Mrs. Gardner reading Mrs. Weathers, "Growth and Development" being the subject. Mrs. R. E. Ware closed the program with a paper her subject being "The Beginning of Cleveland County." These papers were most interesting and instructive. Mrs. Lemons served a delicious ice and sweet course, assisted by her daughter, Miss Mary Ruth Lemons and Miss Kate Webb.

Afternoon Divisions Have Joint Meeting.
One of the largest social gatherings of the week was the joint meeting of the Afternoon divisions of Woman's club at the beautiful new home of Mrs. Z. J. Thompson on Thursday afternoon at four o'clock. The spacious living room where the guests assembled was beautifully decorated with roses and peonies. The roll call was answered by questions of why North Carolina is a great state. "Ho For Carolina" was then sung by all the club members. The meeting was presided over by Mrs. Rush Stroup president of the Woman's club, who called upon Mrs. Frank Roberts to read the late Governor Bickett's N. C. Speech. This was followed by a solo "The Land of the Sky Blue Wa-

ter," sung by Mrs. R. L. Lemons, Mrs. L. M. Hull read Mrs. Palmer Jermans speech before the Federation of Women's club in Raleigh, after which Mesdames Will Harris and Rush Thompson played a duet. Her beautiful new bungalow was opened for Miss McMurry, the South Washington Bridge club, and a number of invited guests. The color scheme of pink and white was attractively carried out in the table decorations of pink and white roses, a touch of old blue being given by the ragged ribbons mixed with the roses. The place cards were miniature brides. The honorary guest wore a lovely black and white dress and hat. The hostess was gowned in pink beaded georgette. After a number of games played Miss McMurry was presented with a lovely negligee from the hostess. Following the presentation, refreshments were served at the individual tables, the color scheme carried out perfectly in the ice and sweet course. Mrs. McMurry was assisted in entertaining by Mrs. D. W. Royster who served refreshing punch, and Mesdames A. W. McMurry, L. E. Ligon and S. S. Royster.

Medicine Is Fed into Lungs of White-Plague Victims

For the treatment of pulmonary tuberculosis a medicine is being used that is inhaled directly into the patient's lungs.

through a tube or mouthpiece. It is composed of amorphous carbon and calcium salts which, it is declared, build up the fibrous tissues, arresting the progress of the disease. Good results are declared to have been obtained in experiments in the east.

Uncle Sam Builds Highways Enough to Circle Earth

More than 8,000 miles of roads of all types were completed with federal aid during the year which ended June 30, 1923, according to a government report. This, added to the mileage completed previously, brought the total for finished projects up to 26,536 miles, or more than enough to circle the earth. The projects under construction at the close of the year amounted to 14,772 miles, and were estimated at 63 per cent complete.

Lamp Is Lighted by Wireless Transmission of Power

Just a glimpse of the future possibilities of the wireless transmission of power was given in the east recently, when an ordinary 110-volt incandescent lamp was lighted while being fed a hot beam of

vacuum tube containing 2,000,000 cycles of alternating current. A loud speaker lacking a horn was also tested. It was a large disk, about three feet in diameter, and connected by wires and a vacuum tube with the mouthpiece. The device did away with the metallic noise, and proved it could reproduce the voice at almost any magnitude.

Payroll Card System Helps in Avoiding Mistakes

Time, expense and mistakes in computing pay of employees of a large eastern company who work on an hourly basis are saved with the use of a system of cards that indicate the length of time a man has worked and the exact amount due. When a task is started, a card, marked in fifteen-minute intervals from 7 o'clock in the morning until 6 o'clock in the evening, is punched to show the beginning hour. Another perforation is made on quitting. This card is placed upon a master card which shows the labor prices in progression from fifteen minutes up to and including eleven hours through the perforations. For the various kinds of work, seventy master cards are used in the factory. They are kept in a handy index so that they may be found immediately.
