Truth Anyway. (From Asheville Times.) O Max Gardner has not retired from politics; in a recent address he declared a college can have no better material to work on than a country boy. To the "Morgue" With It (From Charlotte Observer.) It is being noted around that Mr. Bailey has provided the Greensboro News with an advance copy of his niggeral address. But we do not believe it. Race-track History. (From Greensboro News.) Henry Ford has been selected to referee the automobile races in Indianapolis. Not many people remember that Henry himself was once a racing driver, and continued to race his own cars until he built the famous 999, which was so fast and powerful that he frankly admitted that he was afraid to turn it loose, and therefore hired as his driver an obscure bicycle racer who knew nothing about automobiles, but was willing to try anything once. The bicycle rider was named Barney Oldfield.
