

How Do You Wear Your Hat?

Monroe Enquirer. How do you wear your hat? Dr. C. W. Kimmins, chief education officer of the London county council, who has made a study of the subject, claims to be able to read character in the manner in which the bonnet is tipped. Hat worn well down over the forehead the man is solemn and thought-

ful. Hat pushed back far on the head, the man is a happy-go-lucky. Hat tilted to the right side, the man is a rowdy. Hat tilted to the left, the wearer loses his social status completely, being classed as a mental deficient. Wish old man Kimmins had also told us the character of the college youth who wears no hat at all.

DESIGNERS, FABRICATORS, Erectors, Structural Steel and Concrete Reinforcing Bars. For Office and Store Buildings, Garages, Store Fronts, Mill and Factory Buildings, Machine Shops and Foundries, Churches and Schools. Immediate shipments from Charlotte stock.

LOOK FOR METEORS DURING NOVEMBER

November is a good month to look at the stars, for November is the month of meteors. During October the great nebula in Andromeda can be seen without the aid of a telescope says a bulletin from the American Nature association, which points out that Mars is the only one of the bright planets to be seen in October evenings. You must get up before sunrise to see Venus, which is glorious at that time. Jupiter and Saturn are too close to the sun to be seen in October.

With the visit of Mars this summer, when it was only 34,000,000 miles away, and nearer than it had been in a century, the Nature Association says a remarkable impetus has been given "star gazing." Reports of a new comet discovered by the Bonn Observatory recall the visit of Halley's comet in May, 1910. This "visitor" is due again in 1986. In 1910 the comet was only 14,000,000 miles away. In November every year several meteor swarms are due. The Leonids, so called because they come from the general direction of the constellation Leo, appear about November 15, but you will have to be up before sunrise to see them because Leo is then in the morning sky.

The Andromedes, which will seem to come from the direction of Andromeda, will appear in the evening hours however, about November 23 or 24. Then there are the Taurids, several distinct groups appearing at different times during the month from different points in Taurus. These also will appear in the evening hours, nearly due east. An occasional fire-ball which is a meteor of exceptional size and brilliancy that may succeed in reaching the earth's surface, has been known to appear among the Taurids, so keep an eye on the eastern heavens November evenings. You may see something of special interest in the way of meteors.

The object that will probably first catch your eye November evenings will be the straggling W. in Cassiopeia in the northern heavens, high above the pole. You will probably search in vain for the Big Dipper, for it lies on the opposite side of the pole from Cassiopeia, and is close to the horizon in November that it is concealed from view, partly if not completely, by trees or buildings to the northward. Possibly you will be able to make out the outlines of the Little Dipper through thought with the North Star, Polaris, at the end of its handle.

Next to Cassiopeia, the Great Square in Pegasus with the constellation of Andromeda joining it on the east, is one of the most noticeable of the autumn groups. It now lies directly on the meridian due south of the zenith overhead. To the southwest of the Great Square lies Aquarius, the Water-Bearer, which can be distinguished by the Y-shaped group of stars from which a stream of faint stars is flowing toward the south and southeast. Mars still in Aquarius where it has been for many months, is moving rapidly eastward during November and receding from the earth.

In the east in November you will recognize some old acquaintances in the Pleiades and Hyades in Taurus, and Aldebaran, the fiery red eye of the Bull, November was known in ancient times as the Pleiad month, and the ancient Kings of Persia never failed to grant any request presented to them on November 17, the day when Pleiades came to the meridian at midnight. This exquisite little group with five stars forming a tiny dipper, and two additional stars visible to keen eyes, will be one of the most noted groups in the heavens. The V-shaped cluster of the Hyades is scarcely less famous.

We all have our indications and we invariably fail when we try to deliver the goods we haven't got.

One satisfaction in going back to the old home town comes from finding that your friends, too, have grown either gray or bald.

There may not be as many organ grinders as there used to be, but there's a lot more monkeys behind steering wheels.

TO LET CONTRACT FOR SCHOOL BUILDING.

Sealed bids will be received by the Board of Education of Cleveland county until 10 o'clock a. m. on Thursday, October 24th, 1924, for the construction of a modern school building for the Ware-Bel Consolidated school District. It is to be a brick or brick veneered building containing four class rooms, auditorium, library and office with basement for heating plant. Plans and specifications are on file in the County Superintendent's office at Shelby and J. R. Davis' office in Kings Mountain and may be seen by any prospective bidders. File your bid with J. C. Newton, County Superintendent and a certified check for 5 per cent of your bid to secure the County Board of Education against any loss by reason of the failure of the successful bidder to comply with the terms of his bid. The successful bidder will be required to furnish a good and sufficient bond to guarantee the completion of the building in accordance with the plans and specifications and contract. The Board reserves the right to reject any and all contract let, if let, in J. C. Newton's bids. The bids will be opened at the office at the Court House in Shelby on Thursday, October 24th, 1924 at 10 o'clock a. m. By order of the Board of Education of Cleveland County. J. C. NEWTON, County Supt.

How to Make Money!

PAINT FACTS Illustration describes how to make BEST—PURE—PAINT For \$2.82 a Gallon L & M SEMI-PASTE PAINT is White Lead and Costly White Zinc to assure longest years of wear, as proven by 50 years of utmost satisfactory use. LEAST COST because in Semi-Paste form, and therefore you mix 3 quarts of Linseed Oil to each gallon, and so make 1 1/4 gallons of Pure Paint for \$2.82 per gallon. GUARANTEE - Use a gallon out of any you buy, and if not perfectly satisfactory the remainder can be returned without payment being made for the one gallon used.
