other measures. For a bill to be killed in the next 48 hours means more than usual because President Coolidge has announsion. Congress when reconvened in regular session in December rarely gets started till after the first of the year so it may be said that all important legislation will be postponed for one year-the longest postponement sidential term in many years.

Some Very Important. Some of the bills that will be sidetracked are in a sense too important to be hurried through anyhow. The McFadden bill for instance to amend the Federal reserve act has been the subject of much discussion among bankers and there is divided opinion among some of them though the objective has been praised by many of the leaders who think America's banking facilities will be assisted if national banks are enabled to do some things that state banks can do. On the other hand, some critics point out laxity" and that instead of reducing the national banks to the standards

CAPITAL AND SURPLUS HALF MILLION DOLLARS.

"Any Port in A Storm" For Your Family?

In times of stress ships are frequently forced to put in at the nearest port. It may not be the best port, the safest port, the port of destination. Yet rather than face the dangers of the open sea the ship must find a refuge.

In like manner many families, bereft of the protection of a Will or the guidance of an experienced Executor and Trustee. are forced to seek safety in the first refuge that comes to hand. Litigation, mis-management and unwise investments often wreck the fortunes thus handled.

If you do not want to expose your family to such dangers you should have your lawyer write your Will, and name this conservative institution as your Executor and Trustee.
