Sculptor fired on

Fined For Speeding Here and No Motor Cop in all Cleveland. That Bull-et.

The News and Observer of Friday tells a story that sounds both "fishy and funny" to local people. It is of the recent trip through this section of Gutzon Borglem, noted sculpter, who stopped over at Cleveland Springs on his trip to Chimney Rock. The story tells of the Borglum car being pierced by a bullet and of the party being held up and fined by a rural motorcycle officer in this county. That the have rural motorevele officers, in fact no motorcycle officer at all.

At least the story is interesting, as t reveals the workings of mountain

magination: "Gutzon Borglum, the noted sculpnoon, either in Rutherford county haust from the motor, and no more tained the million dollar class during

car, and from a fairly close range. The hole in the trunk wall is large enough to poke a finger through. The the ack of the head. When shown bullet lodged inside the trunk.

'Mr Borglum with a party of friends was returning from a brief probably fortunate that the car was vacation in the mountains. Included running at a speed that it outran the in the party were R. L. McMilan, Raleigh attorney; Hugo Villa, Mr. Borparty must have made a mistake as glum's studio assistant; Perrin W. to the fine for speeding seems sure Gower, and Ben Dixon McNeill. The here for Cleveland county does not party had climbed Chimney Rock, leaving there about 4 o'clock, intending to Reach Raleigh shortly after midnight. Mr., McNeill was driving. The trip was made in a high-powered

DR. ROBERT L. RAMSAUR, Chiropractor

Dr. R. L. Ramsaur who is cartooned abov is a native of Cleveland county, the son of Thomas Ramsaur. He is a grand-son of the late Major H. F. Schenck, pioneer cotton manufacturer of this section. He was born at Cleveland Mills, this county, and attended Piedmont High School. Later he went to Wake Forest College and Virginia Polytechnic Institute. After finishing his academic training, he took up his professional training at the Palmer School of Chiropractic, the fountain head of Chiropractic, located at Davenport, Iowa, graduating from that institution in January 1918. He went before the state board of Chiropractors in May 1920 and was among the first to stand examination after the State Board of Examiners was formed.

Dr. Ramsaur located in Shelby the following August, almost five years ago and is occupying the same office rooms he started in, located in the Judge J. L. Webb building and on the same floor and near the public library. He stands well in his profession and his practice has gradually grown. While chiropractic is a new healing method to many, the real merit of it is almost unlimited. He is the pioneer in the profession in Shelby and is pleased to have selected such a rapidly growing town. Recently Dr. Ramsaur was married to a most popular Shelby lady, Mrs. Essie Dodd Kendall-that's why he is pictured in the a bove cartoon as "Just Married."

Dr. Ramsaur is a member of the Masonic and Knights of Pythias lodges in good standing.

CAN CHIRROPRACTIC CURE ME?

This is the QUESTION asked by every one coming to the Chiropractor? If so how long will it take? CHIROPRACTIC DOES NOT CURE, NATURE is the only HEALING power, and Chiropractic is the means by which NATURE'S forces are restored to weakened tissues, and HI'ALTH results.

CHIROPRACTIC IS THE MEANS by which the cause is removed and NATURE does the healing. The time it takes depends upon the nature of disorder and how long it has existed.

Most physical disorders result from a part or parts of the body failing to get its normal flow of impulses from the brain, and is unable to meet the demands of the body. This gives rise to symptoms of dis-ease. The shorter time such a condition exists, the less damage is done, and the less time it will take for nature to restore condition to normal health and activity.

Chiropractic is a scientific method of locating and adjusting the cause of disease, without the use of drugs or medicine, by finding and adjusting, with the hands, one or more joints of the spine which are interfering with the normal flow of impulses between the brain and tissue cell.
