BUDGET
SYSTEM**

By means of a budget system all expenses are determined upon a fixed income.

A great many individuals are adopting the budget plan—it is nothing more or less than a systematic control of their expenses, which is a much better means than drifting along in a "HIT or MISS" fashion.

A simple method is to set aside 10% or more of what you make and figure to live on the balance, and often then there may be some left to add to your 10% fund.

Try the budget system for a while; it may be beneficial.

THANKSGIVING DAY

Thursday, November 25th we celebrate Thanksgiving, a day set apart by the Pilgrim Fathers and one we have come to look forward to each year. It is really one of the big days of the year and should mean much to each one of us, for it does good at the climax of the year's effort to recount our blessings and to note wherein we may have failed.

This year many of us will be thankful for just "tiding over," while others have stored much of this world's goods. All of us have much for which we should give thanks. In addition to enough of the things needful and health, and much happiness, we see the silver lining beneath the cloud that may for some have made things dark.

We face the future with more confidence and if we but shake off fear and worry, cut down our extravagances, then bend our efforts to doing our best we shall go on year after year to a glad Thanksgiving Day.
