Mr. D. R. McBrayer has received a telegram from the president of the Pan-American Life Insurance Company, Crawford H. Ellis, carrying assurance that New Orleans is not only safe, but that little or no fear is anticipated from the flood waters. The Pan-American has headquarters in the Crescent City, and Mr. McBrayer represents the company in this territory.

AT THE MOVIES - NEW PAPER MONEY WILL BE SMALLER

"While London Sleeps"—a melodrama starring Rin-Tin-Tin, the famous dog, is the feature picture at the Princess today. Rin-tin-tin is being more and more talked and written about as a movie feature on the big time. One of the biggest pictures of the day is built around this famous canine. This "While London Sleeps" is an unusually good show, with plenty of good tense moments in it. Conway Tearle in "Moulders of Men" is at the theatre Tuesday. It is a Ralph Ince production. It is a romantic picture—a magnificent drama—a presentation of a brave man's struggle against odds. Fox News with the picture. The Princess is advertising the installation of the new cooling system, adding to the pleasures of audiences enjoying pictures at this show house.

An unusual and what should be a very excellent picture, is at the Webb theatre tomorrow (Tuesday)—a film record of the sea battles of our navy during the world war. The picture is entitled "Convoy" and reveals the work of the American sea fighters during the late conflict. The film is said to have cost a million to make. It is put over by an all star cast, including Lowell Sherman, one of the best known of the legitimate actors of the day, William Collier, jr., son of the great William, who is rapidly making a name for himself in pictures, and beautiful and talented Dorothy Mackaill.

The Webb has some super films coming, including one showing "Babe" Ruth in action—a baseball picture—and Gloria Swanson in "The Love of Sunya."

Mountain Fruit Killed
(From The Watauga Democrat)
Reports from all over Watauga are to the effect that the fruit was killed by the recent cold wave, when the extreme temperature registered at 20 degrees. The wheat and rye crop is also reported as being badly damaged. The loss of the fruit-crop alone in the county can hardly be estimated, but it is immense. The trees were in full bloom when the freezes came and the bloom was so heavy that the trees looked much like huge bouquets. It looks as if the loss is complete.

If the old home town is good enough to live in, it should likewise be good enough to buy in.

billings will not have to be folded so much and won't wear out so fast. Besides there will be the saving in the number of designs. The 11 denominations now are made in 39 different designs.

The new currency plan is virtually sure of adoption. After Treasurer Mellon orders the changes, nearly a year will be required for engraving the plates and for printing and distributing the new money.

SMITH LONE HOPE OF PARTY DECLARES MITCHELL PALMER

Asheville.—"If the democrats hope to elect the next president of the United States they must nominate Governor Alfred E. Smith, of New York state on a platform declaring for alleviation of the crying inequalities of taxation that now weigh down upon the great mass of the common people through the yoke of a burdensome tariff," A. Mitchell Palmer, former attorney-general of the United States in President Wilson's cabinet declared here in an interview.

"The democratic party never elected a President on any issue except the tariff issue; it is the party's great issue today; and I know of no man in the United States more capable of rallying the party to that issue than Al Smith," he said setting forth his expression of faith in the party of Jefferson and the common people.

"The talk about repeal of the 18th amendment being an issue of Al Smith if nominated is all nonsense, and I have too much confidence in the sound wisdom and good judgment of Al Smith to believe for a minute that he even dreams of trying to make prohibition an issue."

"I have always taken the dry side of the prohibition question personally," he said, "but that fact doesn't deter me for a moment from expressing my confidence in an administration with Al Smith as the logical standard-bearer of the democratic party."

Unless the democratic party accepts the issue that is ready-made for it—the tariff issue, as he named it—and carries that issue to the great mass of the people whom it concerns, they cannot win with any man, he said. "The tariff bill and it might prove difficult to get a 10 bill changed. So this is not to be inoperative."

Furthermore the smaller sized bills will not have to be folded so much and won't wear out so fast. Besides there will be the saving in the number of designs. The 11 denominations now are made in 39 different designs.

Some time within the coming year, when the storekeeper gives you your change, you may think he is handing you some trading coupons. But you will be mistaken. It will be some of Uncle Sam's new and improved paper money—narrower in width, and shorter in length, and harder to counterfeit.

The new bill will be easier to count and handle, and easier to spend. But they will be just as hard to get as ever. Still, there may even be improvement there. Times are getting better.

Since the first greenbacks were turned out during the Civil War, our paper money has virtually been 7.2 inches long and 3.04 inches wide. The new bills are to be 6 inches long and 2 1-2 inches wide.

WHO IS HE?

When one comes to your town into your neighborhood, the first question you ask is "Who is he, what does he do, how big is his family, where do they attend church?" This is right and proper. You want to know the kind of people moving in among you.

Then, how much more important is it for you to know who the merchant is who is moving into your town, offering goods for you to buy.

WHO IS HE! Haines, The One, Two, Three Shoe Man, Webb Building, Next to Kelly Clothing Co.

His ancestors originally came from Virginia and Maryland into Pennsylvania and Ohio. His grandfather, John Shannon, was a trader and merchant on the Ohio River in 1810.

His grandfather was a John Morrison, a Scotchman.

His father, Mahlon N. Haines, was a Quaker merchant.

His mother, Mrs. E. A. Haines of Washington, D. C., was the woman known all over the country as having the largest store in the world, built, owned, and controlled by a woman.

The sidelights on his life are these:

Born in Ohio; raised in Washington, D. C.; educated at the Maryland University; won gold medal as best drilled man; played short stop on first baseball team; traveled extensively in Europe and all over America; in 1909 was married; started in the shoe business with a loan of \$127.00 worth of shoes; believed in quick sales and lots of them. Today he has forty shoe stores; several big farms; big real estate operations; a hotel man; financier; yet with all, is a home-loving man who plays baseball with his boys, rides horseback over the jumps with the best of them, gives liberally; makes money by giving more for the money; sells four pairs of shoes to get the profit usually expected on one pair.

"Haines One, Two, Three Shoe Stores all over the South" means just what it says. Shoes for One, Two and Three dollars a pair, the like of which you have never bought before; Haines Stores have already started in Charlotte, Greensboro, Lexington and Shelby, and will open stores in other towns all over the south as soon as locations are found.

Haines says, "I believe in the South and its great future. The people are my kind and I like them. And every dollar the Haines One, Two, Three Stores makes will be left in the South."

These stores are financed by southern capital, managed by southern men who profit on each pair of shoes sold.

We are here to serve, and I'm a firm believer that he that serves best profits most.

We have already counted you among our friends and customers.

P & N WAITING ON DECISION BY I. C. C.

Gaffney, S. C.—E. Thomason and Frank Cochran, general manager and chief engineer, respectively, of the Piedmont and Northern, were Gaffney visitors Thursday.

All work on the proposed Piedmont and Northern railway extension in the two Carolinas is temporarily tied up pending a reply to the railway's request, made at a hearing before the interstate commerce commission, in Washington, on Friday of last week, Mr. Thomason said.

A decision is expected next week in the dispute on whether or not the commission has jurisdiction over the railway.

Within a week after the decision is made, it was stated, operations can be started. This, of course, depends on a favorable reply. In the event of an adverse decision and the railway does come under the jurisdiction of the commission, there may be a lengthy delay of the \$20,000,000 project.

The plans call for a completion of the link between Spartanburg and Gastonia and pushing further north from Charlotte to Winston-Salem.

While here Thursday Mr. Thomason stated the Piedmont and Northern plans to build the connecting link between Spartanburg and Gastonia by way of Gaffney. For this reason the forthcoming decision of the interstate commerce commission is of vital importance. The national transportation act prohibits the building of a new railway parallel to an established line unless the commission grants a certificate stating that the new road is required by public necessity and convenience. Several rail companies, including the Southern, are fighting the electric line's efforts to secure authority for constructing the extensions.

Two arguments have been presented to show that the Piedmont and Northern should not come under the jurisdiction of the interstate commerce commission.

Exemption is claimed because of the fact that it will be strictly an "interurban" railway and not a trunk line. It is pointed out that stops are placed at an average of one and one-half miles on the entire line.

The other reason for which exemption is claimed is that the new work is to be merely the completion of a project started in 1912 by James B. Duke, prior to the enactment of the transportation act.
