A Question For You: Why do more than 20,000 people read The Cleveland Star? Another One: Why is it that the growing merchant always uses Star advertising space? Could it be because the Star publishes more news of Cleveland County than all other papers combined?

Crops Looking Fine—School To Open 8th—Picnic by Double Springs Adalt Dept.

(Special to The Star.)

Lattimore, July 25.—Farmers in this vicinity are greatly encouraged, because of the glowing prospects of one of the largest crops of both corn and cotton ever raised in this community. Crops are about laid by and are generally in fine condition.

Our school under the proficient management of our principal Prof. Lawton Blanton will begin its 1927-28 session on Monday, August 8th. A fine corps of teachers has been selected and everyone is looking forward to one of the most prosperous years in our school history.

The singing school in progress at the Baptist church under the direction of Prof. J. A. Ruebush of Dayton, Va., is progressing satisfactorily. Interest and attendance seem to be growing daily.

On last Saturday afternoon it was our privilege to attend one of the most delightful and enjoyable picnics of this day and time, given by the adult department of the Double Springs Sunday school of which Mr. W. A. Crowder is president. An interesting address was made by Prof. Ruebush on the great advantage to be derived in maintaining rural churches. This was followed by an address by Mr. O. M. Mull, of Shelby, on the importance of adults attending Sunday school. Another important feature of the occasion was the delightful music rendered by the famous Lattimore quartet, consisting of Mr. Gideon Price, Messrs. Monroe and sons, and Hulsey and son, with Miss Alice Poter at the piano. And last but not least, the program being completed, the crowd repaired to a point near the fine double springs where a long table had been erected and which had just been laden from end to end, by the good ladies of the church with the most bountiful supply of precious delicacies that has ever been our lot to behold.

What we did then, it is not necessary to say. We commend the Double Springs people on their great hospitality and generosity. Glad to note that Miss Edna Mae Brooks, who has been quite sick is reported much better. Mr. Julian Deberry, a trestle foreman on the Seaboard has been at home on a ten day's vacation. Mr. Gilmer Callahan, of Charlotte, who has been visiting his parents, Mr. and Mrs. C. W. Callahan returned home Sunday afternoon. Rev. J. W. Needham, of Polkville preached in the school auditorium last evening.

Mr. S. Cabaniss who resides on Shelby street has sold his residence to Mrs. W. T. Cotton and in the near future will move to his farm in the Cabaniss community.

NEEDLEMAN WANTS DAMAGES FOR HIS BODY MUTILATION

Raleigh.—The Needleman mutilation case of 1925 returned to the public spot light this week when a copy of petition of Joseph H. Needleman, Philadelphia, asking \$100,000 damages for mutilation of his person by a masked mob was received at the office of United States Marshall Ward here.

The petition has just been filed in United States District Court at Washington, N. C., under jurisdiction of the Eastern Federal District of North Carolina.

Needleman is suing for \$75,000 compensatory damages and \$25,000 punitive damages against 22 persons of Martin County, three of Lenoir and two of Wayne County.

Prison punishment and fines were meted out to 28 persons following trial for mutilation and conviction at the May special term Martin County in 1925.

The petition just filed calls for answer from those against whom warrants are being issued by the District Court clerk at Washington where the trial will be held. The answers are due within twenty days.

Needleman, two years ago was freed of attacking Ethel Griffin, of Martin. He was arrested March 26, 1925, in Eflenton, N. C., taken from jail and his person mutilated.

Needleman brings suit as a pauper and brings it in Federal court by reason of being a non resident of citizenship of the 28 defendants.

The coolest fabrics are those which allow the most rapid passage of air and perspiration vapor through them. In tests conducted by the United States bureau of standards, a sample of the cloth is clamped on the end of a cylinder, into which air is pumped. A gas meter measures the quantity of air escaping through the fabric in a certain length of time.
