Alibi Al Hedges A Bit And Talks Old Football History Although he picked his winners on Wednesday Alibi Al today began hedging his guesses, and in doing so lived up to his name, the heritage of a family that made excuses on the Mayflower—Yes, Al's ancestors came over on the old boat, one of his great grandfathers having predicted that in time Shelby would be an ideal headquarters town to look over the best football in the country.

College Head In Attack At Paid Athletes College Durham.—No self-help student having a job in a university or college of North Carolina will be eligible for participation in college athletics should a recommendation made by Dr. Elmer R. Hoke, president of Catawba college, in the opening session of the ninth annual meeting of the North Carolina college conference here, be adopted. Striking deep down into athletics of the higher institutions of learning, Dr. Hoke, through his recommendation received by the conference in writing, due to the inability of its author to attend, would make it impossible for any student receiving pay from his school for any job performed to play on any of the college teams.

The living room, library and dining room were attractively arranged with baskets and bowls of dahlias and wall vases of cosmos. After the regular choir practice the following musical program was given. A vocal duet, "When I Hear the Old Church Choir Again," by Mrs. Horace Grant and Mrs. Raymond Cline, Mrs. W. K. PROHIBITION A FAILURE?

Stanly News-Herald. "What do you think of the Volstead law?" an Albemarle man asked us Saturday afternoon just as we were writing these editorials. We answered him with something like this: "Well, I don't know. What do you think about it?" "I think it is the biggest failure in the way of a law this country has ever seen. This very afternoon there are twenty places right in this town where there is liquor. Prohibition is a failure and we might as well admit it," he went on. And this man neither drinks nor handles whiskey, but is one of the most upright men in the county.

Paris.—Two coats of lip rouge make the newest complexion trick of the pretty Parisienne, who perhaps understands better than any woman in the world the subtle technique of make-up. One coat is not enough, she has discovered. By shaping tiny half-moons of salve, first with one, then with the other sanguine tinge, every woman can create a pair of lips that are uniquely her own in color as well as form. This double process preferably adapts itself to the home toilet where the first coat is applied firmly and the second sparingly until precisely the desired shade appears. Rouge should not rub off, according to Lucien LeLONG, who is now making as exquisite beauty preparations as goss for the women. Only inferior lipsticks of a soft and greasy consistency leave their traces on napkin, cigaret and... sweetheart. For good lip rouge takes for its base real wax and substitutes of tallow and less-oil fats find their way into the cheap salves. In Germany, where cheap rouge is much used these days, restaurant-keepers who find that no amount of boiling will remove the red streaks of lip rouge from their table linen, have recently decided to bring back the wartime paper napkin. Swarthy complexions are no longer in fashion and the woman who formerly returned from a summer at Deauville very proud of her nutmeg glow, hastens to her beauty specialist to have the burn removed before her first appearance in formal dress at a smart function.
