MOTORS TO PASS 5,000,000 TOTAL
Ford and Chevrolet Will Account For Half Of Total, Says Dalton.
New York.—American automobile manufacturers are planning to make 5,000,000 motor cars in 1929 and to sell nearly 4,000,000 of them here at home.
The other million will be exported.
This forecast of 1929 automobile production was made here by James Dalton, industrial editor of Motor Magazine, who has just completed a survey of 1929 plans of motor builders.
The production will be the largest in history. It represents one new car or truck for approximately every 25 persons in the United States.
In 1926 more cars were sold in the United States and Canada than in any one year, a total of 3,203,000 having been sold then. In 1929 motor makers expect to surpass that figure.
"Unit output will approximate the long heralded, but never realized 5,000,000 cars and trucks in 12 months," Dalton said. "This would compare with about 4,600,000 last year, 3,575,000 in 1927, and 4,500,000 in 1926. The proportion of production probably will be around 4,400,000 cars and 600,000 trucks."
"Ford and Chevrolet together will make perhaps half the total, while Willys-Overland, Hudson-Essex, and Chrysler-Dodge will account for another 1,000,000 at least.
This would leave something like 1,500,000 for the rest of the field. Probably a third of the residue will be absorbed by General Motors units aside from Chevrolet, giving other manufacturers 1,000,000 to divide among themselves.
"By far the majority part of whatever passenger car gain there is will go to makers of cars selling at wholesale for less than \$1,000 and most of it to those selling for \$750 or less.
Economic stability of the country was given as the main reason for the expected huge motor production."
"Ford, with books full of unfiled orders, will reach capacity output early in the year," Dalton said.

PROBABLY THE GERMS WOULD BE EMBARRASSED
Raleigh.—Dr. Charles H. O'Laughlinhouse, state health officer, believes that women are less susceptible to influenza than men because they wear less clothes.
"Too many clothes causes a person to become easily overheated and lowers the resistance," Dr. Laughlinhouse said today. "Nobody can say that the women wear too many clothes and it has been my observation that they have greater freedom from colds and flu than the men."
