Gastonia Talking Of Light Problems

Citizen There Fears Utilities Company May Soon Control All Towns.

In view of the fact that Shelby at the present time is considerably interested in anything dealing with light and power rates, the following comment of a Gastonia citizen appearing this week in The Gazette may be of interest here:

"If we do not watch the Southern Public Utilities company they are coming into Gastonia and buy out our local light and power plant," said a citizen of the town this morning.

"They have secured entrance into every town around here; Gastonia is the only place where they have not succeeded in buying the local light and power plant and they are anxious to come in, but the city is making good money from the sales of light and power from its own plant and it would not be good business to sell it now unless we could get a big price for it, and the S. P. U., is not going to pay too much for it.

"If the city of Gastonia can make money off it, I say let's keep it. First thing you know, if the S. P. U. get hold of it, rates on lights and power will jump out of sight; and there will be no getting around it, for they will be the whole cheese around here and can set the price what they want it to be.

"No, I think we should give this matter a lot of study before we sell out to them; let's debate the proposition and look at it from every angle before we get too far. The purchase a few weeks ago of these outside lines was just a step toward the eventual purchase of the city plant, if it could be effected.

"In the approaching municipal election to be held in May, every candidate for the city council should make his position on that matter plain when he announces his candidacy."

Aluminum is combined with other metals, according to reports of processes developed by a San Francisco inventor, to form valuable alloys. With gold, a hard, light alloy is prepared; a silver mixture so hard that it can be sharpened to a razor-edge is also made, and copper is made suitable for use in tools.

Segrave Rides His Car For New Record

Englishman Goes Fastest Ever Known To Man In Auto At Daytona.

Ocean Speedway, Daytona Beach, Fla., March 11.—In a flaming streak of super-speed, Major H. O. D. Segrave, famous British race track driver, today set a new world's speed record for automobiles when he sent his powerful Golden Arrow machine roaring over the hard wave-lapped ocean speedways here at the tremendous speed of 231.36246 miles an hour.

Driving his beautiful 12-cylinder machine at a dazzling pace, Major Segrave eclipsed by 23.81 miles an hour the former record of 207.55 set here last year by Ray Keech, of Philadelphia, in the 36-cylinder Triplex owned by J. M. White. The new mark also surpassed by 23 miles an hour the record of 203 which Segrave set here in 1927 with his Sunbeam Special.

Amazing Speed.
On his first official run north, Major Segrave negotiated the measured mile in 15.55 seconds for the amazing speed of 231.51125 miles an hour. His second trial made southward over the course was clocked at 15.57 seconds for a speed of 231.21387 miles an hour. His average elapsed time was 15.56 seconds and his average two way speed was 231.36246 miles an hour.

INVENTS TALE OF BOUT; GETS TRIAL

Fort Mill, S. C.—A young Fort Mill man recently suffered much embarrassment in Recorder Patterson's court when he was brought in on a warrant charging him with fighting a negro. The warrant was issued when the recorder learned from a responsible citizen that the young man had told him of the fight.

It developed in the course of the examination that the young man had drawn on his imagination for the story, and confessed tearfully to the recorder that there had been no fight. The matter was closed with some admonitions concerning unwise and hasty speech to gratify a vainglorious ambition, and handshaking and promises for the future.
