Vanity Of Fair Sex Boosts Sale Of Fags

Monument To Ad Writer Who Suggested Smoking To Reduce.

Greenville. — Women aren't any "hotter" these days, but they are smoking more, local tobacconists assert. And vanity, they add, is back of the steady increase.

"Manufacturers of a certain type of fag have gone so heavy on the 'grab a Lucky instead of a sweet' stuff that most women, in the opinion of vendors of the weed, have a sort of subconscious feeling that the use of tobacco will keep that girlish beauty.

"Nine out of ten women who buy cigarettes from me have a tendency toward plumpness," one dealer said, "and most of them assure me that they have taken up smoking to reduce."

Although some people can still remember when a woman who smoked was known as "fast," no such attitude appears to exist today. Women who thought nothing of smoking indoors a few years ago now think nothing of smoking on the street and in drug stores.

And half of the fire glowing from behind sedan doors on the main stem come from a tack in a Cupid's bow mouth.

All of which confounds church people and delights the druggist, who are planning to erect a monument to the ad writer smart enough to commercialize vanity.

Doubtful Flattery. There was a burst of applause as the pianist finished his last solo. He bowed, and after thanking his audience, was about to leave when a man approached and presented a check. This the pianist refused, saying he would prefer it to be used for some charitable purpose. "In that case," said the donor, "I suppose you wouldn't mind if we added it to our special fund?" "Not at all," said the pianist. "What is the special fund for?" "To enable us to have better entertainments for next year."

"GUS AND GUSSIE" — A Man Of Choice.

Dangerous Eyes.

Copeland's HEALTH TALK

● Pleurisy Danger
 By ROYAL S. COPELAND, M. D.
 (United States Senator and former Health Commissioner of New York)
 (Inquiries may be addressed to Dr. Copeland, care The Star, Shelby, N. C. If you desire a personal reply, enclose a stamped envelope, addressed back to you.)

A few days ago I talked with a rugged and apparently healthy young woman. She told me she had just recovered from an attack of pleurisy.

This is a disagreeable ailment. It attacks persons of all ages. In itself the disease is not particularly important. Unfortunately, however, there is a disagreeable relationship between pleurisy and tuberculosis. Not for a moment would I have you think that every case of pleurisy is a symptom of tuberculosis. I do want you to know, however, that no chances must be taken in recovering from an attack.

Too many of us are inclined to sneer at disease. We take it too lightly. During the fever and the uncomfortable symptoms accompanying it, we form all sorts of resolutions. We determine that we are going to do everything necessary to avoid sickness in the future.

But just as soon as we begin to get better our good resolutions are forgotten. In our hurry to get back to business we do not give Nature half a chance to complete the recovery.

There are some attacks of pleurisy which, painful as they are, are not particularly serious. A perfectly healthy individual may suffer with symptoms of pleurisy after exposure to wet or cold.

There are the usual signs of trouble. Slight fever and pain in the side. When the doctor listens to the chest he finds friction in breathing. In a favorable case, there is no accumulation of fluid within the chest and the symptoms disappear within a few days.

In another type of pleurisy there is an accumulation of fluid. The word used to describe this is "effusion." The condition is known to the doctors as "pleurisy with effusion."

In every case we are dealing with an ailment of considerable consequence. An unfriendly germ is present in the system. It is bound to be an uncomfortable neighbor. You need not think you are going to die if you are unfortunate enough to take on a passenger of this description, but certain precautions are absolutely necessary.

I wouldn't speak to you at all about this matter if I did not do it for a specific purpose. I want you to understand that pleurisy should not be neglected. If your doctor tells you you have this ailment and advises you to keep quiet, you should do exactly as he says.

The germs I have mentioned are germs capable of producing pus, or to create other unpleasant complications. They lead to a physical condition which may make you very ill and impair your usefulness for a long time.

You should lead such a life that your powers of resistance are always operating. They are working all the time to guard you against enemies if given half a chance. Hard work and worry lower the vitality. The burden of having to

tant than any ordinary personal property. Guard it against harm, and if by any chance you do get sick, deal honestly with Nature. Assist her in the process of getting well.

Answers To Health Queries.
 Mrs. W. Q.—My boy of six is very active, but highly nervous. He was rather delicate up to two years ago, but has since improved. He has bright red rings beneath his eyes which are very noticeable since he is rather pale otherwise. What would you suggest?
 A.—The child may have intestinal worms.

J. H. C. Q.—What is the Forye disease?
 A.—This is a condition marked by the presence of numerous small yellowish white bodies or granules on the inner surfaces of the lips.

Mrs. D. D. Q.—What do you advise for developing the legs?
 A.—I would suggest that you gain weight in general. Walking, skating and dancing are all good exercises for developing the legs.

Felicit R. Q.—What is "rales"?
 A.—This is a symptom, not a disease. It indicates mucus in lungs or bronchial tubes.

Colonel Stewart is to get a pension of \$50,000 a year. The way of the transgressor depends upon what company he works for.—San Diego Union.

Already sound and color have been added to the movies, and smell is said to be next. How about a little more taste?—Christian Science Monitor.

TORTURING PAINS

Ceredo Lady Tells How She Was Unable To Find Anything To Relieve Them Until She Took Cardui.

Ceredo, W. Va.—In telling how she was benefited by taking Cardui, Mrs. Perle Yelkey, of this place, says: "At one time, I had a very serious spell which left me weak. At times, I would suffer such intense pains across my back and in my side that I could hardly stand it."

"I endured this over and over again. Every time the pains were worse than before."

"I was in despair because nothing helped me. I tried several remedies, but I continued to suffer."

"One day, I read about Cardui. Other women told how they had gotten strong and well after taking it. I have often been thankful for that day, for after I had taken Cardui for awhile, I felt like a different human being."

"It did not seem possible, but I did not suffer the old, torturing pains, and I really felt well. I can heartily recommend Cardui, for I know how much I improved after I took it. Since then, I have taken it several times when I have needed a tonic, and I have always been benefited. It is a wonderful help. All good druggists sell Cardui. Try it for your troubles. NC-199

Talking Ball For Shelby This Year Over The Section

Hickory Record.
 Will Hickory be minus baseball games completely during the summer months? So far, sport followers of this city have made no effort whatever to organize a baseball team for summer games, and no interest has been shown in organizing a city league for the younger players of the city.

Meanwhile, Lenoir and other towns are completing plans for a summer baseball circuit, something like the little Western Carolina league of 1926, which included

Hickory, Newton, Morganton and Valdese.

What Hickory should join in the way of leagues has not been determined, but if baseball was established, in an organized circuit, there should be no reason why Hickory and other cities of this section shouldn't open a real league, something like the Eastern Carolina loop.

Sport fans of Hickory, Statesville, Gastonia, Concord, Kanna-

polls, and Shelby should join in an effort to establish a small circuit for next season with a full six game per week schedule under the regular league rules with Judge Bramham, or some other capable man at the head of the loop. These six cities could easily afford to keep up a circuit on about the same scale as the Eastern Carolina loop. Why not talk up the baseball music and be ready to at least tune in for next season?

THE MORE YOU LOOK AROUND

The more you'll appreciate the fact that we're living in a fast age; the other night one of our neighbors was looking over the evening paper and his wife asked him if there were any new fashions: "Yes," he replied, "but they're out of date, this is this morning's paper."

You'll be up to date if you will join the majority of motordom in demanding and using exclusively Sinclair gas and oil. They are the only economical products to use if you are interested in securing greater mileage at no sacrifice of cash or motor life.

Cleveland Oil Co. Distributors

Years of service in MODEL T FORDS

THE Model T was so strongly and sturdily built that it is still rendering reliable, economical service to motorists in every section of the country. Millions of these cars can be put in shape for two, three and five more years of use at very small cost.

So that you may have this work done economically and satisfactorily, the Ford Motor Company is still devoting a considerable section of its plants to the manufacture of Model T parts. It will continue to do so as long as they are needed by Model T owners. The following list gives the approximate labor charges for reconditioning the Model T Ford—

Engine	
Tune motor (including replacement of commutator case, brush and vibrator points if necessary)	\$2.00
Grind valves and clean carbon	\$3.75 to 4.00
Overhaul carburetor	1.50
Refine detachable carburettion hands	1.50
Install new pistons or connecting rods	6.00
Tighten all main bearings	6.00
Overhaul motor and transmission	\$20.00 to 25.00
Rear System	
Replace rear axle assembly	2.50
Install universal joint	1.50
Refine brake shoes	1.50
Replace rear axle shaft, drive shaft pinion, or drive gear	5.00
Overhaul complete rear axle assembly	\$5.75 to 7.00
Rebush spring and perches	1.75
Oil and graphite springs	3.00
Front System	
Overhaul front axle	\$4.00 to 5.00
Rebush spindle bodies and arms (both sides)	2.50
Replace or straighten spindle connecting rod	.75
Tighten radius rod or steering knip cap	.60
Tighten all sockets and joints of front end	1.50
Replace front spring tie bolt or new leaf	2.50
Straighten front axle	3.00
Chassis	
Replace rear fender	1.75
Overhaul steering gear	3.50
Repair muffler	1.00
Overhaul radiator	7.50
Repair coupe	25.00
Repair sedan	25.00
Repair Touring Car	20.00
Reupholster Runabout	8.00
Reupholster Touring Car	15.00
Replace top deck (Coupe or Sedan)	4.00
Overhaul starting motor	3.00
Overhaul generator	2.60

These prices are approximate and are for labor only, because the need and number of new parts depend on the condition of each car. The charge for these parts is low, however, because of the established Ford policy of manufacturing and selling at a small margin of profit.
