QUALITY so fine that half the world

It is an impressive fact that men and women are buying from two to five times as many new Buicks as any other car priced above \$1200. Moreover, during August and September, Buick monopolized its market to such a de-

gree that it won 41% of the total sales of the 15 makes of cars in its price class. And yet this marked preference for Buick would be still greater if all motorists realized that they can buy six of the fourteen luxurious Buick body types for less than \$1300, f. o. b. factory.

These are Buicks through and through, embodying the full array of Buick quality features: Buick's new and surpassingly beautiful Bodies by Fisher; the famous Buick Valve-in-Head engine-most powerful engine of its size in the world; Buick's new Controlled Servo Enclosed Mechanical Brakes; the new Buick steering gear; new Road Shock Eliminator; and Buick's new, longer rear springs with Lovejoy Duo-draulic Shock Absorbers.

The new Buick, with these features, will introduce you to new and unequaled performance, driving ease, riding comfort and reliability on any day you put it to the test. And yet these six Buick models are offered at the price of cars which motorists never think of comparing with Buick!

Visit our showroom. Bring your present car. Learn how easily you can obtain one of these new Buicks. All are available on the extremely liberal General Motors time payment plan.

In addition to these lower priced models, Baick offers eight other distinguished body types, representing the ultimate in luxury, and priced from \$1465 to \$1995, f. o. b. factory.
