

GARDNER EXPLAINS STATE FARM AIDS

\$4,000,000 Worth More of Food and Feedstuffs is Goal for 1930 Over 1929.

Raleigh.—"It is the ambition of his administration to produce in 1930 not less than \$30,000,000 worth more of food and feed-stuffs than has produced in 1929 and I firmly believe that this can be done," Gov. Max Gardner states in a letter addressed to the heads of all state institutions at which one of the 30 state-owned farms is located. Referring to the pamphlet "In-

stitutional North Carolina," recently sent out by George R. Ross, director of state-owned farms, Governor Gardner states that this pamphlet, prepared at this request, is placed in the hands of the heads of all public institutions in the state with a view of co-ordinating and making effective his program of placing the state institutions on the most productive basis possible. "In this connection," he writes, "I wish to request that you keep an accurate record of the food and feed-stuff produced this year on the lands of the institution under your direction and submit to me, next fall, for publication and for presentation to the advisory budget commission and to the general assembly, a complete detailed report thereon."

"Things I Ate Hurt Me"

"I HAD a severe case of indigestion," says Mrs. Bell Buckheiser, 7 River St., Piedmont, S. C. "So many things that I ate hurt me, I almost quit eating. I would burn in my chest. I had severe headache, and such a tight, smothering feeling. I would be obliged to eat a little, then it would hurt me. A friend said to me: 'Why don't you take Black-Draught?'"

"I was just too weak then to do my work. I began taking small doses after meals, and in just a few weeks I could eat anything I wanted to, then take my small dose of Black-Draught and feel fine. I soon regained my health and strength." Costs only 1 cent a dose.

Germany Seeks Word Of Missing Prisoners

125,000 Men Taken in War Still Unaccounted For Despite Efforts of League

Berlin.—Though the war ceased more than ten years ago, the League of Former German War Prisoners declared that there are still 125,000 German war prisoners missing.

The number of Germans taken prisoners of war on the various sites of operation amounted to about 1,000,000. Of these 125,000 were not accounted for when the prisoners were finally released. Many thousands are still scattered over Siberia probably in a state of economic dependence that does not afford them a chance to start the homeward journey.

Of the Germans taken war prisoners by France fully 40,000 are still missing. Actuated by the case of a German prisoner who was supposed to have died years ago but turned up again in the French Foreign Legion, the League of Former German War Prisoners recently addressed a letter to the French Government asking for information of the missing 40,000.

The prisoners' league is also in correspondence with the League of Nations regarding many thousands of claims of pavement for work done by prisoners of war for citizens of the entire countries. "It is true," says a report issued by the prisoners' league, "that the French Government has recognized these claims and partly paid them in debased francs, Russia, Rumania and Belgium have absolutely denied any obligations of that nature while the English government has recognized half of 350,000 such claims submitted to it."

Recently the League of Former German War Prisoners joined a movement with similar English, French, Austrian and Hungarian organizations to urge their respective governments and the League of Nations to regulate the rights of war prisoners by an international agreement.

ELLENBORO VOTERS ARE BEHIND BAILEY

Belief Expressed That He Will Carry Township In Senate Race. Opinion Divided.

Ellenboro.—While it is generally believed that Bailey will carry the township and county in the primary election, it will be a hard fought senatorial contest. So far as can be learned, the Bailey supporters will include some of the leading Democrats of the county. Simmons is being backed by some of the leading professional and business men of the county.

It seems that one strong objection to Simmons is that he is an old man, has held the office a long time. However, the older men will vote for Simmons. He can be assured of all the votes of the anti-Smith Democrats. It appears now that Bailey will get the votes of the younger men. The Bailey supporters are strong against Simmons for not supporting Smith in the general election.

Views of Citizens. A prominent physician of Ellenboro has this to say "Simmons should be nominated for his long life of service, and recognized as one of the strongest men in the senate. His outstanding ability and long service are two prime factors in his favor. And he had the courage of his conviction by not voting for Smith, because he (Smith) did not accept the Democratic platform."

Another Simmons man has this to say: "Simmons has done more for the state and is interested in the political situation. A new man would necessarily have to become familiar with the state's affairs."

A leading merchant says: "It seems assured that Bailey will be in the lead in the primary election, and he should be elected for the fact that Simmons did not support the nominee, Smith, in the general election. He is the best qualified for the position on account of his age and general health, and because he is a straight, loyal Democrat and has always supported the nominee of the party. Persons in the large cities want a change and will cast their vote for Bailey, while the small towns will vote for Simmons."

The young German who built a model of the Cologne cathedral out of 2,500,000 matches, and came to New York to get money to finance the rest of his education apparently hopes to set the world on fire as an architect.

Lattimore showed a decided improvement in attack in the second half and scored 8 points, but the damage had been done in the opening period.

Over 60 Countries Now Treat Colds Without "Dosing"
Modern Vaporizing Ointment Fast Replacing Old-Time Internal Remedies

A generation ago, it was the custom to give large doses of internal medicines for colds and almost every human ailment. Then, a North Carolina pharmacist originated Vicks VapoRub, the modern method of treating colds without "dosing." Today, the whole trend of medical practice is away from needless "dosing."

As more and more people adopted this modern external treatment, the fame of Vicks spread until today it is the standby for colds—adults as well as children—in over 60 countries.

This ever-increasing demand is shown in the figures of the familiar Vicks slogan. Made famous when Vicks reached "17 Million Jars Used Yearly," and later raised to "21 Million," these figures, too, have been outgrown, as there are now "Over 26 Million Jars Used Yearly," in the United States alone.
