YOU DON'T HAVE TO MOVE HEAVY FURNITURE

With the old-fashioned vacuum cleaners, it was necessary to pull and tug at heavy chairs and davenports in order to clean under them. With Air-Way this is unnecessary. The Universal Joint, an Air-Way feature, makes it possible to clean underneath furniture, reach difficult corners, clean stairs thoroughly by a simple wrist movement. You can stand in the center of a 9x12 rug and clean in all directions. Thought and engineering skill have been devoted to conserving time and energies of women, and Air-Way's Universal Joint is today making housekeeping easier work in hundreds of thousands of homes.

Thrift— Nature's Own Scheme

IT IS A PART of Nature's plan for her creatures to save. Witness the dog bury the bone in order that he may not have to go hungry on the morrow! Watch the squirrel hide away acorns for the winter! Notice how the bees work industriously, storing away honey!

Nature instilled the habit of thrift into these lesser creatures. We call it instinct. But nature endowed us with intelligence, hoping we would realize the need for thrift instead of being driven to it by instinct.

Are you choosing to do the thing Nature requires the lower creatures to do? If not, you should begin saving now!
