MUCH CANDY USED IN NORTH CAROLINA

State Ranks 15th in Amount Consumed. Costs Enough To Pave Much Highway.

Greensboro.—Foreigners visiting the United States are wont to remark upon the number of luxuries Americans consume and when have, in some cases, become necessities, except in time of war. Among the latter class the most outstanding is candy.

The last census of candy consumption in this country is for the year 1928 and it is claimed that the business of manufacturing is growing rapidly to keep up with the increasing demand. Figures for the United States and for North Carolina are interesting.

It appears from the tabulation of the statisticians, that the per capita consumption in the United States, two years ago, was 11.56 pounds. In North Carolina the consumption was a little over 4 1-2 pounds under the gross average; the state consuming 6.95 pounds per person.

North Carolina ranked 15th in the amount of consumption by states, with New York leading and Pennsylvania second. One of the astonishing figures in the tabulation was that of Arizona where the very small population consumed over 14 pounds per person average.

The cost of candy consumed in North Carolina year before last was low per person, averaging but \$1.32. The total amount, however, would have paved a long stretch of highway or would have built another Jefferson Standard building and four 14 story hotels. The amount shown in total, from 80 per cent of the manufacturers, was \$5,363,990.

The cost of transportation must have been a significant amount, as most of the candy was shipped in from other states and the total weight was a few pounds over 10-210 tons, or about the same weight as a ship that was christened upon its launching recently in England.

It was seen, from the tabulated figures, that an increase in the candy manufacturing business in North Carolina is strongly indicated. The amount shipped into the state was 95.56 per cent of the amount consumed, leaving but 4.41 per cent of home manufactured products.

North Carolinians are extremely

proud of their natural resources and the made in Carolina products that are reasons for frequent display and wide advertising. It would seem that in the manufacture of candy for home consumption there is still much to be desired before it can be put on a basis with other made in Carolina products.

In these days of unemployment there is no doubt a slackening in the sale of candy as in all other non-essentials but if the candy, or a large part of the candy that is consumed in this state were made at home, it would serve a double purpose; offer employment when it is most needed and keep within the state an amount of money that is of noticeable importance in any industry.

The Flower Garden.

(From The Sanatorium Sun.) Patients, employes, and others have shown considerable interest, and pride in the Sanatorium's new flower garden, which has been planted just back of the Main building on the site of Gordon cottage, which was torn down after the opening of the new building.

The flower garden was laid out by a well-known landscape gardener without cost to the institution, and is already a delightful spot. As soon as the plants reach their full growth it is expected to be one of the most beautiful of its kind in the state.

Constipation Troubles

"I HAVE used Black-Draught as a family medicine for a good many years," says Mrs. Sallie Laughrun, of Hunt Dale, N. C. "I have found it an excellent remedy for constipation and the troubles that follow it. I have suffered frequently from gas pains, and when I am bothered that way I begin at once to take Black-Draught. Relief follows quickly."

"I give Black-Draught to the children when they are constipated, and it is not long until they are running around again."

Thousands of others have reported good results from the use of this purely vegetable medicine. Insist on the genuine Theoford's
