Can't Be Fooled.
Entebbe, Uganda.—There's one sharp constable here. He can't be fooled. He stopped a car and informed the passengers they could not proceed until the Prince of Wales had passed. A government official explained the prince was in the car. "Oh, I've heard that before," said the constable, taking out his little notebook. The prince's chauffeur stepped on the gas.
Dense Dorothy thinks the nava-parley has something to do with a certain kind of oranges.

Test Made of Essex New Challenger Car

Last week was Essex challenger week when a demonstration was offered the public of the new Essex model cars throughout the nation. The Beam Motor company, local dealers, gave a number of demonstrations here to Shelby people during demonstration week and a representative of The Star was "taken for a ride." It maintained a speed of eighty miles per hour, increased its speed from five miles per hour to 40 miles per hour in eight and a half seconds and showed a gasoline consumption of 18 to 20 miles per gallon, according to a careful check.

Community News Of New House Section

Star Advertising Pays

Now Majestic GUARANTEES No Reduction in Prices!

Realizing that a satisfied owner is the greatest advertisement of all, Majestic has always sought to have its owners proud of their purchase. Majestic owners are proud of their Majestic sets. To prove it, look around you—make inquiries—ask your neighbor who owns a Majestic. And many more than two million happy people do own them.

Effective immediately, Grigsby-Grunow guarantees that the company will not reduce the list prices of its present models up to January 1, 1931.

In the "For Sale" columns of the want ad sections of great city dailies, you will find hundreds of other sets "For Sale Cheap," but you seldom find a Majestic thus advertised.

Pause and realize the significance of the above announcement—Majestic, the world's largest manufacturers of complete radio receivers, can only make it because of having already put into effect every saving possible through mass production and mass purchasing power. Majestic has priced its present series of sets at the lowest possible figures at which quality merchandise, of the standard required by Majestic engineers, can be produced—has instituted the most economical distribution methods known to the industry.

In fact, it's hard to buy a "second-hand" Majestic. Dealers will tell you that the few times they do take in a Majestic it is usually part payment on a new Majestic; and the "old Majestic" is sold so quickly there is hardly time to even wipe off the dust. In practically every section of the country the dealers' own Blue Book, which gives the official trade-in price of every make of radio set, classifies Majestic as having the highest trade-in value of any radio set in the country.

Your investment is safe with Majestic—safe as to quality, safe as to price. If you have hesitated to buy a Majestic, being confused at the lurid offers of bankrupt merchandise being dumped on the market, go this day to any authorized Majestic Dealer and buy your Majestic. You can feel absolutely confident that you are buying a good money's worth and absolute security on value, not to mention the most important thing of all—your pride in owning a set that is the finest that hands and brains can create.

This bespeaks pride of ownership. But this ad gives you another definite reason why you can be prouder still of any Majestic you are thinking of buying.
